

Hella Electrics:

Relays, Horns and Switches

Horns have a long tradition at Hella. Hella has been developing and manufacturing acoustic signal units on the highest technical level for almost 100 years.

A distinction is made between signal horns, Supertone horns, electric two-tone fanfares and compressor or pneumatic fanfares.

Signal horns make a relatively hard sound which is radiated mainly focused forwards. This achieves good penetration of the traffic noise over a great distance. The sound pattern is best as a set with one high and one low tone.

Supertone horns are particularly suitable for extreme conditions since they have a greater penetration force on account of their size and more powerful electrical drive.

Electric two-tone fanfares have a full, harmonic sound. The broad sound radiation cannot be overheard even at junctions.

Compressor fanfares have an energetic double or triple sound achieved by a maintenance-free compressor.

Pneumatic fanfares are characterized by a penetrating, voluminous sound. This is generated via the vehicle pneumatic brake system.

Quality is extremely important at Hella. Safety products such as horns and fanfares demand top precision and reliability. Hella products not only comply with the strict legal regulations but also with the much more demanding requirements made by vehicle manufacturers and the aftermarket.

Hella Worldwide

Hella is a globally positioned, independent family-owned company with 23,000 employees at 70 locations in more than 30 countries. The Hella Group develops and manufactures lighting and electronic components and systems for the automotive industry, and still has one of the world's largest trade organizations for automotive parts, accessories, diagnosis and services. Complete vehicle modules, air-conditioning systems and vehicle electrical systems are produced in joint venture companies. With more than 3,200 people working in research and development, Hella is one of the most important innovation drivers in the market. In addition, with sales of 3.3 billion Euros in fiscal year 2008/09, the Hella Group is one of the Top 50 automotive parts suppliers in the world and one of the 100 largest German industrial companies.

Ideas today for the cars of tomorrow

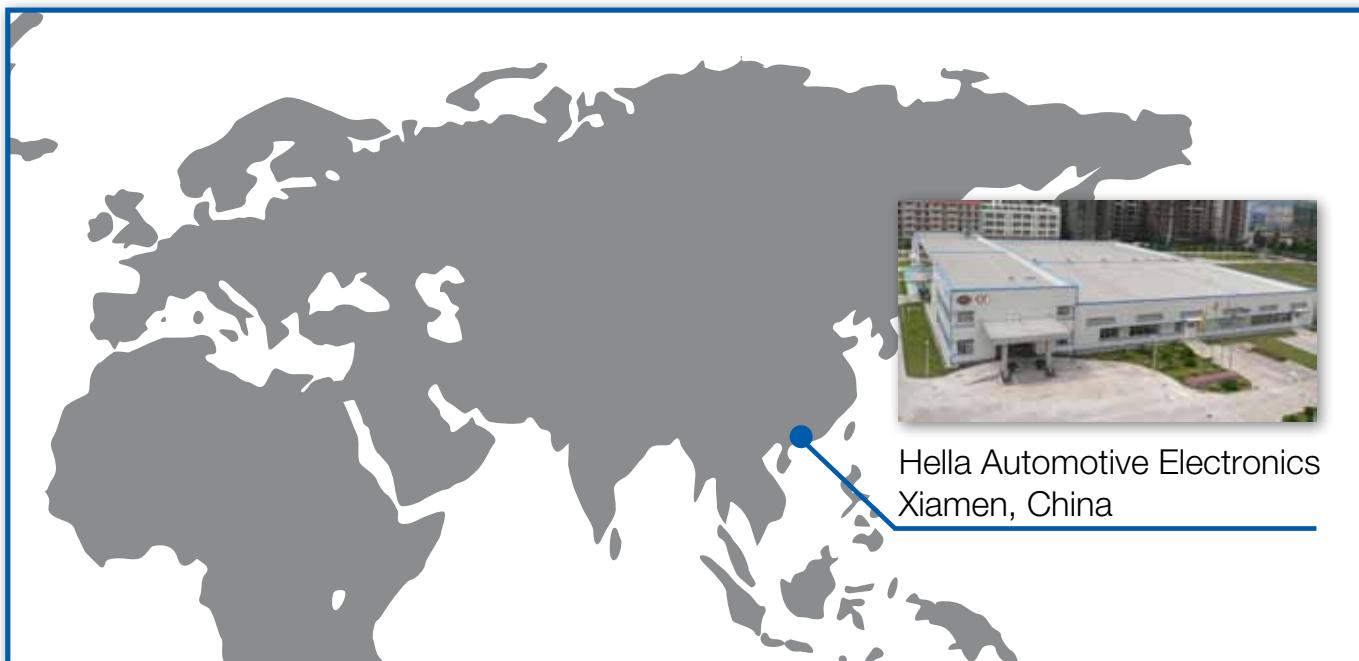

Hella exploits synergies to the advantage of vehicle manufacturers, thanks to Hella's expertise in the fields of lighting and electronics and thanks to intelligent network partnerships with strategic suppliers. This offers customers the benefits of a flexible, medium-sized company and comprehensive technological solutions.

Thanks to an intelligent network strategy with suppliers, Hella is creating added value for vehicle manufacturers. It therefore offers vehicle manufacturers an attractive alternative to mega suppliers in terms of innovative ability and global presence.

Hella Automotive Electronics

Hella Automotive Electronics is Hella's world class relay manufacturing facility located in Xiamen, China. Opened in 2003 and 100% Hella owned since January 2009, Hella Automotive Electronics is Hella's global central resource for the design and production of electromechanical relays including some of our most popular products:

Hella, Inc. is the Hella sales and distribution company serving the USA, Canada, and the Caribbean. We are a world-class supplier to the automotive aftermarket, marine, and heavy-duty accounts. Hella, Inc. is also the primary marketing arm of Hella and Behr Hella Service in the USA and Canada. Marketing activities include print media, online support, trade shows, and motorsports activities. With experience as an original equipment supplier and knowledge in the European aftermarket, Hella's sales force is able to offer a service of excellence in the NAFTA region. For over 25 years Hella, Inc. has been offering German engineering with American pride to the U.S.A.

www.hellausa.com

Actuation time:

Time between switching on the power until the contacts are closed with certainty. This includes the chatter time.

Armature return force:

Force with which the contacts are pulled apart when opening measured at the center of the contact surface.

Contact force:

Force with which the closed contacts are pressed against another measured at the center of the contact surface.

Contact gap:

Air space between open contacts.

Continuous current:

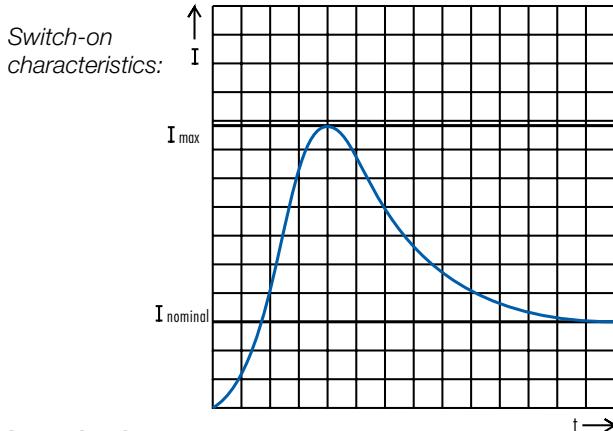

Current load through the relay which can flow continuously without damaging the relay.

Erosion margin:

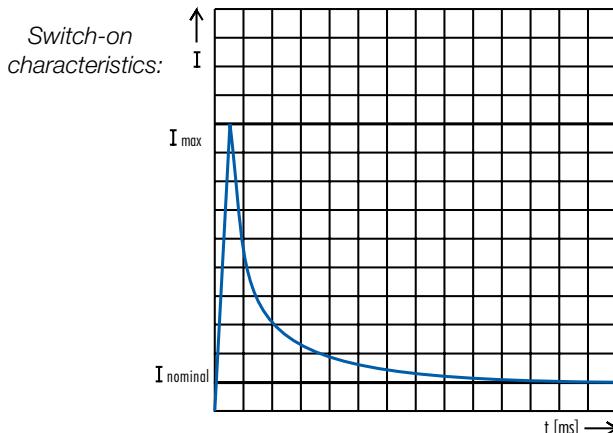

Excess travel is the distance the armature moves after closing the contacts before making contact with the solenoid core measured at the contacts.

Inductive load (motor):

The switch-on current increases rapidly up to a multiple of the rated current and then flattens out to the rated current (e.g. when fan motor starts running). When switched off a voltage of up to several thousand volts can be induced leading to an arc between the relay contacts as they begin to open.

Lamp load:

The switch-on current can be up to 10 times the rated current when the lamps are cold (e.g. headlamps, glow plugs).

Mechanical service life:

Service life of relay without electrical load on contacts, the coil is actuated with 10 rectangular pulses per second for testing.

Operating voltage:

Voltage range in which the relay operates reliably at the specified temperature.

Permissible ambient temperature:

Temperature range in which the relay fulfills the specified data and operates continuously without damage.

Protective system IP 5K4K:

Hella relays are protected against unintentional contact, are splash-proof and fulfill the requirements for protective system IP 5K4K to DIN 40 050 when installed upright with the flat plugs pointing down.

Pull-in voltage:

Voltage on the coil at which the relay moves from the non-actuated position to the operating position (operating contacts closed – armature pulls in).

Rated voltage:

Voltage of vehicle electrical system, 12V or 24V.

Release time:

Time between switching off the coil current until the contacts open with certainty. This includes the chatter time.

Release voltage:

Voltage on the coil at which the relay returns from the operating position to the non-actuated position (armature is released). See pull-in voltage.

Resistive load:

The current is approximately the same from the time it is switched on until it is switched off (e.g. rear window defroster or mirror defroster).

Storage temperature:

Temperature range in which the relay can be stored without damage.

Switch-on current (inrush):

Load current flowing through the relay contacts immediately after closing.

Test temperature:

Temperature at which the service life and environmental tests are performed.

Test voltage:

Voltage at which the service life and environmental tests are performed.

Voltage drop:

Voltage loss in relay with load current applied and contacts closed measured at a load current of 10A between flat plugs of load circuit.

Winding/contact test voltage:

Voltage maintained between excitation and load circuit and between open flat plugs in load circuit up to electrical separation.

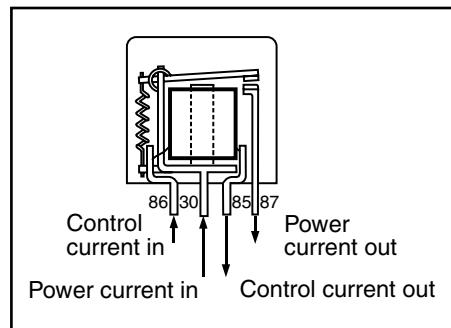

What is a relay?

Briefly: a remote-control switch in which an electro-magnetically produced force operates the contacts through which the main power current flows.

Why use a relay?

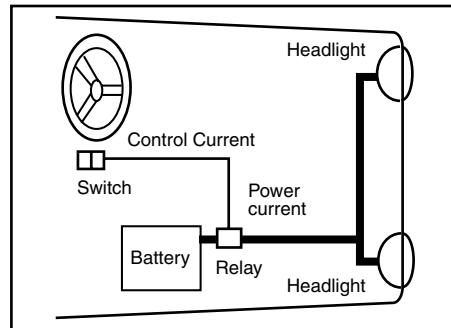

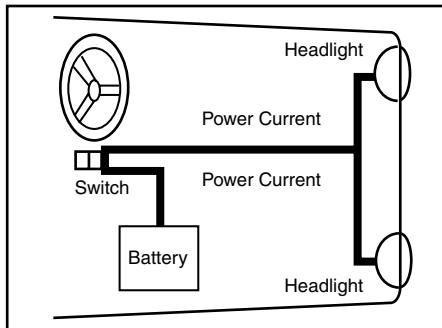

Leads are resistances. Resistances cause voltage drop, which means that consumer performance is reduced.

One of the basic rules of electricity states that the electrical resistance of a lead depends on its length and cross-sectional area. The longer and thinner it is, the greater the resistance will be. Higher resistance means less voltage at the far end of the lead, i.e. where the power user is. If the power user is a bulb, a little less voltage will mean a lot less light, as illustrated in the table below:

Operating voltage*		Luminous intensity
100%	=	100%
95%	=	83%
90%	=	67%
85%	=	53%

* 100% = 6.75 volts
or 100% = 13.5 volts
or 100% = 27 volts

Important:

The importance of optimum operating current and the negative effect voltage drop can have, e.g. on the luminous intensity of a bulb, can be seen from the table above.

Not good:

Power current must travel from battery to headlamps - via the dashboard switch using large gauge cable.
Result: voltage drop causing reduction in headlamp performance.
Possible overloading of switch.

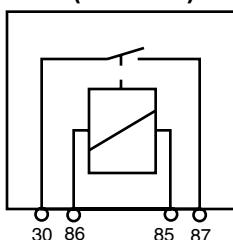

The best solution:

The power current is routed over the shortest distance between battery and headlamp via the relay. A control current lead of only 0.75 sq. mm (current consumption for this lead less than 150 mA) is required between dashboard switch and relay.
Result: practically the whole power current reaches the consumer.

What sorts of relays are there?

1. The normally-open relay:

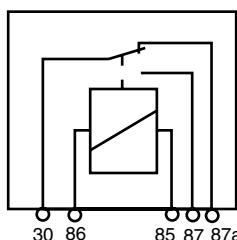

1 Form A (SPST-NO)

A normally-open relay closes an electrical circuit when current is passed through its coil. Normally-open relays are required for all types of vehicle lighting, horns, fanfares, heating circuits, fan motors and air-conditioning equipment.

2. The change-over relay:

1 Form C (SPDT)

A change-over relay switches current from one user to another. Change-over relays are used for switching from the horn to the fanfare, from forward to backward movement of the sliding roof, from opening to closing electrically operated windows and for two-stage users such as fans and some rear window heating systems.

Eliminating voltage spikes: Relays with resistor and diode coil suppression across terminal 85 and 86.

Voltage spikes from 300V to 500V can occur momentarily when a relay is switched off. Sensitive electronic equipment can be damaged or malfunctions can occur if these spikes reach the vehicle electrical network without suppression. A relay with a resistor reduces these voltage spikes to less than 100V. A relay with a diode eliminates them completely. The correct polarity of the connections is marked on the diode protected relay.

933332291 - Single - Min Order Qty: 1
933332297 - Bulk - Min Order Qty: 200

**Dimension Drawing****Technical Data**

Nominal Voltage	12V	Operating / Releasing Time	$\leq 10 \text{ ms} / \leq 10 \text{ ms}$
Rated Continuous Load	N/O 40A N/C 20A at 85°C	Dielectric Strength	$\geq 1,000 \text{ VDC}$
Ambient Temperature	-40°C...+85°C	Max. Inrush Load	150A
Contact Form	1 Form C / SPDT	Resistive Load / Switching Cycles	N/O 40A, N/C 20A, 100,000 cycles
Contact Material	AgSnO ₂	Inductive load / Switching Cycles	N/O 20A, 100,000 cycles N/C 6A, 60,000 cycles
Operating / Drop out Voltage	$\leq 8.0 \text{ V} / \geq 1.0 \text{ V}$	Lamp Load (capacitive) / Switching Cycles	N/O 20A N/C 10A, 100,000 cycles
Max.Coil Voltage	20V	Vibration	20 – 200 Hz, 5 g; no contact openings > 10 μs
Coil Resistance	73.8 Ohm $\pm 10\%$ (incl. suppression component)	Mechanical Shock	Min. 10 g, 11 ms; no contact openings > 10 μs
Suppression	Resistor, 560 Ohm	IP Rating	IP54 DIN IEC 60 529
Mechanical Cycles	10,000,000	Terminals	85, 86: ISO 8092 6.3 x 0.8, E-Cu, tin plated 30, 87, 87a: ISO 8092 6.3 x 0.8, E-Cu, tin plated

Part No.

**961553151****2 Pin Flasher Unit - 12V (Single)****961553157****2 Pin Flasher Unit - 12V (Bulk 50 Pieces)**

High capacity flasher with 6 bulb maximum.
Suitable for hazard warning applications.

Max Load: 12 lamps / 25 Amps (Hazard)

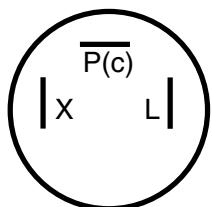

Bracket: H84677001

961553161**3 Pin Flasher Unit - 12V (Single)****961553167****3 Pin Flasher Unit - 12V (Bulk 50 Pieces)**

High capacity flasher with 6 bulb maximum.
Suitable for hazard warning applications.

Max Load: 12 lamps / 25 Amps (Hazard)

Bracket: H84677001

**961553171****3 Pin Flasher Unit - 24V (Single)**

High capacity flasher with 5 bulb maximum.
Suitable for hazard warning applications.

Max Load: 10 lamps SAE # 1683 (Hazard)

Bracket: H84677001

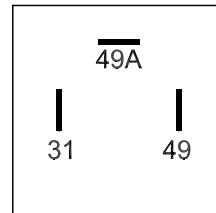

Part No.

H42675031	3 Pin Flasher Unit - 12V (Single)
931675037	3 Pin Flasher Unit - 12V (Bulk 320 Pieces)

High capacity flasher with 8 bulb maximum.
Suitable for hazard warning applications.

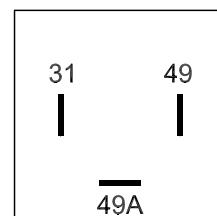

Max Load: 16 Bulbs (Hazard)

H42562061	3 Pin Flasher Unit - Sealed - 12V (Single)
931562067	3 Pin Flasher Unit - Sealed - 12V (Bulk 256 Pieces)

Sealed flasher that operates 2 bulbs on either side of vehicle.

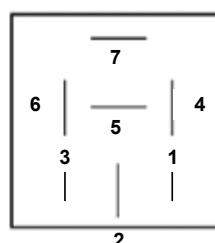

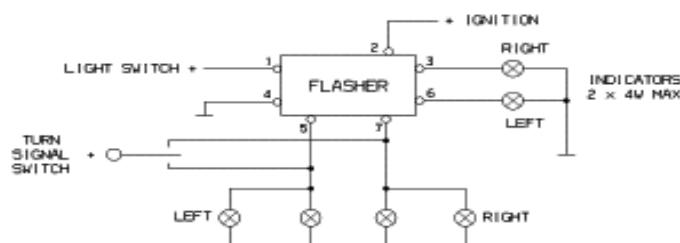

Max Load: 2 x 2.1 Amp Bulbs (Flasher)
4 x 2.1 Amp Bulbs (Hazard)

933825007	7 Pin Flasher Unit - Sealed - 12V (Bulk 387 Pieces)
------------------	------------------------------------------------------------

Flasher unit that operates 2 bulbs on either side of vehicle
Separate outputs for left and right side along with left and right indicator outputs

Max Load: 4 Bulbs (Hazard)

Part No.

009492101	LED Flasher Unit, 2+1+1 - 12V
009492111	LED Flasher Unit, 3+1 - 12V
009492001	LED Flasher Unit, 2+1 - 24V
009492011	LED Flasher Unit, 3+1 - 24V

Flasher units suitable for use with either bulb lamps or LED direction indicator lamps. The flasher units have two modes of warning while the indicators are operating.

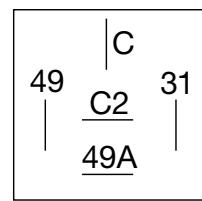

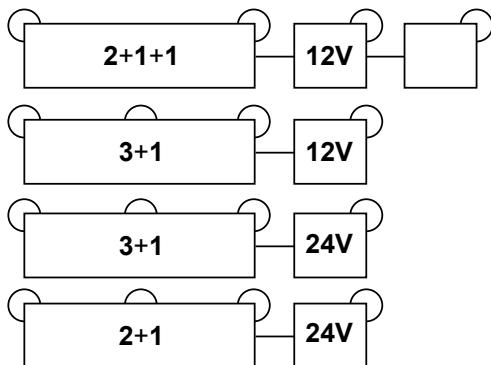

1) Prime mover

- Lamps will flash rapidly to indicate a failure.

2) Prime mover plus trailer

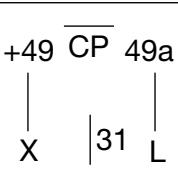

- Separate pilot lamp will not illuminate to indicate a failure.

(Single)

**003787071****4 Pin High Capacity Flasher Unit - 24V (Single)**

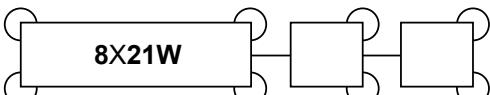

Heavy duty flasher unit designed for loads totaling 200W.

Max Load: 200W combined load

**996173017****6 Pin Flasher Unit, 2+1+1 - 12V (Bulk 250 Pieces)**

Flasher unit operates 2 bulbs on either side of towing vehicle plus an additional bulb on either side of two trailers.

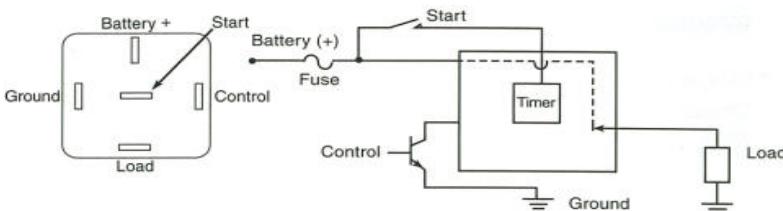

Max Load: 2 + 1 + 1(8) x 21W

Part No.

H43453011	4 Pin Time Delay Unit - 2 Second Delay on Release - 12V (Single)
931453017	4 Pin Time Delay Unit - 2 Second Delay on Release - 12V (Bulk 256 Pieces)

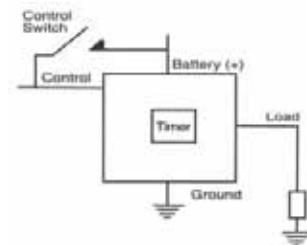

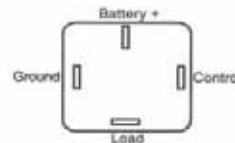

Fixed delay of 2 seconds
SPST relay output

H43430011	4 Pin Time Delay Unit - 5 Second Delay on Release - 12V (Single)
931430017	4 Pin Time Delay Unit - 5 Second Delay on Release - 12V (Bulk 256 Pieces)

Fixed Timing
Meets All Applicable U.S. Safety Standards
Stable Electronic Timing
Fits into ISO Socket
Output SPST Relay

Max Load: 20A at 100,000 operations
Operating Voltage Range: 9 - 15V DC
Operating Temp. Range: -40°C to 60°C
Storage Temperature: -40°C to 125°C

**Timing Mode**

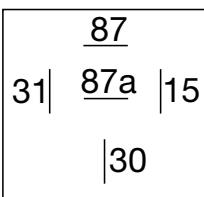

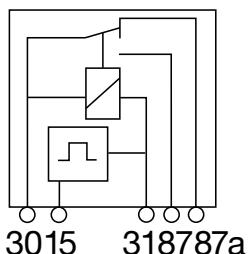

Mode: Delay on Release

Operation Description: Input voltage must be applied continuously. The output is energized (relay transferred) when control switch is closed. Timing starts when the control switch is opened. At the end of timing, relay will de-energize. The time may be reset to zero during timing by closing the control switch.

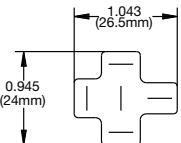

996152131	Adjustable Control Time Delay Unit - Delay on Release - 12V
996152141	Adjustable Control Time Delay Unit - Delay on Release - 24V
996152151	Adjustable Control Time Delay Unit - Delay on Operate - 12V
996152161	Adjustable Control Time Delay Unit - Delay on Operate - 24V

Designed for a wide range of applications requiring a time delayed switch on or off.
Time Delay Range: 0 to 900 seconds

008458011	Battery Master Switch - 250 Amp Continuous Load
042991001	Replacement Key

For battery main lead
 Connection to either positive or negative lead
 Switch key removable in "off" position only
 Current supply interrupted when key removed
 M10 screw contacts
 2 switch positions: 0 = off, 1 = on

Max Load: 2500A at 24V (10 sec.)

IP Rating: Key side IPX4
 Connection side IP53

(Single)

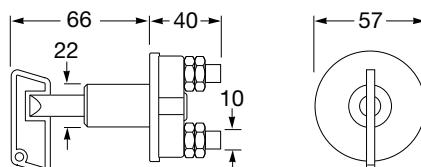

002843001	Battery Master Switch - 50 Amp Continuous Load (Single)
002843011	Battery Master Switch - 100 Amp Continuous Load (Single)
706729011	Replacement Key (Bulk 10 Pieces)

For battery main lead
 Connection to either positive or negative lead
 Switch key removable in "off" position only
 Current supply interrupted when key removed
 M10 screw contacts
 2 switch positions: 0 = off, 1 = on

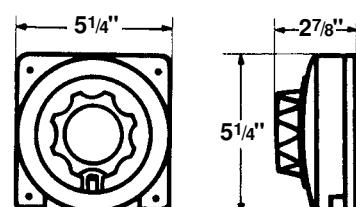

Max Load:
 1000A at 12V (10 sec.), 500A at 24V (10 sec.).

IP Rating: DIN 40 050 - IPX 2

005519001	Battery Master Switch (Single)
------------------	---------------------------------------

Rotary Switch for 6, 12, 24, and 32V Applications
 Enables Switching from Batter 1 to 2 or Both
 Seawater-Resistant
 Noncorroding Black Housing
 Max Load: 175A at 12V (10 Sec.)
 Max. Continuous Rating: 150A at 12V

Modular Rocker Switches

For particularly energy-efficient & maintenance-free interior applications in commercial vehicles, passenger cars, agricultural and construction machines, as well as special vehicles.

Energy efficiency:

The increase in control electronics components makes particular demands on a vehicle's energy system.

Since the power supply causes high costs, the trend is toward very low control currents that must be switched in a reliable manner.

The Hella solution:

frictional snap-in system as well as selected contact combinations.

The AgNi standard version makes reliable switching functions possible even in the mA range.

Likewise, particularly efficient power LED light sources help to reduce the power requirements as compared to previous switch ranges by up to 70% per switch.

Maintenance-free:

The user expects reliable and maintenance-free function over the entire vehicle life. In particular, the service life (cycles) of the contact system, as well as the service life of the light source are the influencing parameters.

Hella offers its customers the particularly wear-resistant "microswitch system". Thanks to the frictional snap-in system, wear and contamination of the contact surfaces are minimized with every switching operation.

The average service life of an LED is up to 100,000 hours.

An additional feature is the use of 4 light sources.

In this way, all switching conditions can be confirmed in the best possible way (2 location and 2 function lights).

Mounting frame:

A modular system with a new design makes all installation configurations possible.

Indicator lamps:

For safety-relevant or special applications, a reliable indicator lamp can be delivered that provides information about the switching condition in a non-local manner.

001539001

Steering Column Combination Switch (Single)

108 mm lever
Lever contoured 26°
60mm long lead with 6.3mm blade terminal contact for terminal 31b
Functionality includes left, right, horn, and headlamp flasher

Max load at 12V:
Turn Signal 8A
Horn 10A
Headlamp Flasher 2A

001539047

Steering Column Combination Switch (Single)

115 mm lever
Straight lever
Knob with symbols
Part connected to a lead set
Functionality includes left, right, horn, and headlamp flasher
Max load at 12V:
Turn Signal 8A
Horn 10A
Headlamp Flasher 2A

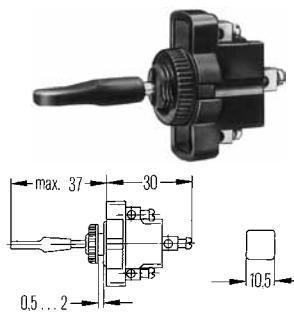

008520047

Steering Column Combination Switch (Single)

195mm length
Mounting strap for 38mm diameter steering column
Black body and handle
Functionality includes left, right, horn, and headlamp flasher

Max load at 12V:
Turn Signal 7A
Horn 15A
Headlamp Flasher 12.5A

001545001

Turn Signal Toggle Switch (Bulk 10 Pieces)

Max load:
5A at 12V
2A at 24V

Part No.

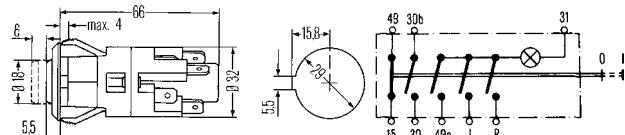

001579011	Hazard Flasher Switch (Bulk 5 Pieces)
001579071	Hazard Flasher Switch w/ Pre-fitted 24V Bulb (Bulk 10 Pieces)

Push button switch
Includes eight 6.3mm blade terminal contacts

Max load: at 12V
Terminals 49 - 15, 49a - L, 49a - R: 7A
30b - 30: 14A

008021001	Universal Lighter - Illuminated - 12V
008021011	Universal Lighter - Illuminated - 24V
008022001	Universal Lighter - Not Illuminated - 12V
008022011	Universal Lighter - Not Illuminated - 24V

Compact flush-fit
Rated for at least 10,000 activations
Terminals: 6.3mm blade
Dashboard thickness: up to 2.5mm
Mounting aperture: 28mm diameter (008021001 and 008021011)
23.5mm diameter (008022001 and 008022011)

Max Load: 10A at 12V
5A at 24V

(Single)

008023011

Power Socket with Cover - Illuminated - 12V (Single)

12V 1.2W Bulb: 007997011
24V 1.0W Bulb: 007997021

008023001

Power Socket with Cover- Not Illuminated - 24V (Single)

Compact flush-fit version for operation of auxiliary equipment in cars, trucks, campers and boats.
Terminals: 6.3mm blade
Dashboard thickness: up to 2.5mm
Mounting aperture: 28mm diameter

Max Load: 15A at 24V

001946021

ISO 4165 Socket with Cover - 1 Screw Contact

001946011

ISO 4165 Socket with Cover - 1 Blade 6.3mm Terminal

001946051

ISO 4165 Socket with Cover - 2 Blade 6.3mm Terminals w/ Ground

Compact light alloy flush-fit socket.
Grounded via housing
Dashboard thickness: up to 7mm
Mounting aperture: 18.5mm diameter

Max Load: 8A at 24V

(Bulk 10 Pieces)

Part No.

H84777011	ISO 4165 Socket with Cover - 2 Blade 6.3mm Terminals (Single)
004777001	ISO 4165 Socket with Cover - 2 Blade 6.3mm Terminals (Bulk 5 Pieces)
H84777001	ISO 4165 Socket with Cover - 2 Screw Contacts (Single)
004777011	ISO 4165 Socket with Cover - 2 Screw Contacts (Bulk 5 Pieces)

Compact plastic flush-fit socket.

Dashboard thickness: up to 7mm

Mounting aperture: 18.5mm diameter

Max Load: 8A at 24V

004123014	ISO 4165 Standard Socket - Plastic Surface Mount / Waterproof (Single)
------------------	------------------------------------------------------------------------

Max Load: 8A at 24V

007589021	ISO 4165 Universal Plug (Bulk 10 Pieces)
------------------	------------------------------------------

Universal plug with screwed strain relief / without fuse
2 screw contacts to 2.5 sq. mm.

Max Load: 16A at 24V

002252102	ISO 4165 Economy Universal Plug (5 x 3 mm Cable Opening) (Single)
002252103	ISO 4165 Economy Universal Plug (5 x 3 mm Cable Opening) (Bulk 12 Pieces)
001921102	ISO 4165 Economy Universal Plug (8 mm Diameter Cable Opening) (Bulk 12 Pieces)

002262001	ISO 4165 Standard Plug (Bulk 10 Pieces)
001915001	ISO 4165 Standard Plug with Strain Relief (Bulk 10 Pieces)

2 screw contacts CuZn up to 2.5 sq. mm.

9.2 mm Diameter Cable Opening

Max Load: 18A at 24V

Part No.

001943003

7 - Pole Socket – Plastic (Bulk 25 Pieces)

H84989041

7 - Pole Socket - Metal (Single)

Socket with lid

Removable contact set.

Max Load:

16A at 12V (lead size 1.5mm²)

25A at 12V (lead size 2.5mm²)

001918021

7 - Pole Plug - Metal

001918002

7 - Pole Plug - Metal

001930003

7 - Pole Plug - Plastic

With strain relief and grommet.

Max Load:

16A at 12V (lead size 1.5mm²)

25A at 12V (lead size 2.5mm²)

(Bulk 25 Pieces)

007645021

ABS/EBS 5/7-Pole Socket (ISO 7638-1) (Single)

Socket made of plastic with lid.

With rubber gaskets and nickel-plated contact pins.

Fiber-glass reinforced polyamide housing.

PG gland for cable exit.

Mounting aperture 54 mm diameter

For cable diameter 9 - 16 mm.

Contact pins: 5 each of 1.5 sq. mm + 2 each of 4 sq. mm + 2 each off 6 sq. mm and 2 dummy plugs.

Class of predction IP54 in plugged condition.

Max Load:

16A at 24V (lead size 1.5mm²)

25A at 24V (lead size 2.5mm²)

30A at 24V (lead size 4.0 - 6.0mm²)

Part No.

007644041**ABS/EBS 5/7-Pole Socket (ISO 7638-1) (Single)**

Plug made of plastic
 With rubber gaskets and nickel-plated contact pins
 Fiberglass reinforced polyamide housing
 Mechanical strain relief
 Secure arrest with non-rusting metal bail
 For cable diameter: 11 - 13 mm
 Contact sleeves: 5 each of 1.5 sq. mm + 2 each of 4 sq. mm + 2 each of 6 sq. mm and 2 dummy plugs
 Class of protection IP54 in plugged condition
 Crimp or solder connection

Max Load:
 16A at 24V (lead size 1.5mm²)
 25A at 24V (lead size 2.5mm²)
 30A at 24V (lead size 4.0 - 6.0mm²)

**003833001****7 - Pole Socket (ISO 1185) - Metal (Single)****008085001****7 - Pole Socket (ISO 1185) - Plastic (Single)**

With rubber gasket in lid and cable protection
 grommet for cables with diameter of 8 - 11 mm
 and 16.5 - 19.5 mm.
 Mounting aperture: 50 mm diameter

Max Load:
 15A at 24V (lead size min. 1.5 sq. mm)
 20A at 24V (lead size max. 2.5 sq. mm)

**003831001****7 - Pole Plug (ISO 1185) - Metal (Single)**

With screw-on strain relief and cable protection
 grommet for cables with diameter of 8 - 11 mm.

**008084001****7 - Pole Plug (ISO 1185) - Plastic (Single)**

With strain relief, union nut and rubber gasket.

Max. load:
 15A at 24V (lead size min. 1.5 sq. mm)
 20A at 24V (lead size max. 2.5 sq. mm)

**004797071****7 - Pole Connector Cable (ISO 1185) (Single)**

Extremely resistant to high and low temperatures as well as weathering, maximum resistance to oils and chemicals. Very good fatigue strength against repeated bending. Excellent return characteristics.

Sheathing: Polyurethan.
 Lead size: 6 x 1.0 + 1 x 1.5 sq. mm.
 Lead dia.: 8.8 mm. Outside dia. of coil: 48 mm.

Stretched length: 4.0 m.

Part No.

H81953011	Electric Vacuum Pump with Connector Interface (Single)
H81953021	Electric Vacuum Pump with Quick Connect Terminals (Single)

Applications:

Designed to supplement diesel engines in controlling heating and cooling functions, door locks, cruise controls, trunk release or any other functions controlled by vacuum.

Features:

- 12V DC
- Sealed motor (inlet port, outlet and pump end)
- Environmentally tested; humidity, salt, fog dust, air and water leakage
- Meets one (1) meter (3.28 feet) drop test
- Electrical Terminals: meet axial force (push/pull) of 40-45 pounds
- Vibration tested: eight (8) hours per plane; amplitude (peak to peak) 1.27 mm (0.05 in.)
- Electrical Stress Tested; Load Dump, Reverse Voltage, Short to Power Ground, non-disruptive transients and stall
- Meets standard corrosion test ASTM-B 117
- Temperature Range: -25°C to +96°C
- Weight: 13 grams (11 oz.)
- Chemical Resistant:
 - 50/50 water, ethylene glycol antifreeze
 - Dexcon II transmission fluid
 - Leaded or unleaded regular gasoline
 - Diesel fuel
 - Dot 3 hydraulic brake fluid
 - Ethanol, 25% methanol +5% liquid soap in water

Performance Specifications:

- Evacuate a 40 cubic inch (minimum) reservoir from atmosphere pressure to 15 inches of mercury vacuum in maximum of 20 seconds.
- Internam switch turns motor off when the vacuum reaches a maximum of 15 inches of mercury. When vacuum is reduced to a minimum of 11 +2 or -0 inches of mercury switch will reactivate motor to increase vacuum.
- Motor draws no more than .65 average amperages with 13.5V applied to pump terminals.

Type 1: Connector Interface

Electrical connector supplied through Packard.

Connector 12052641

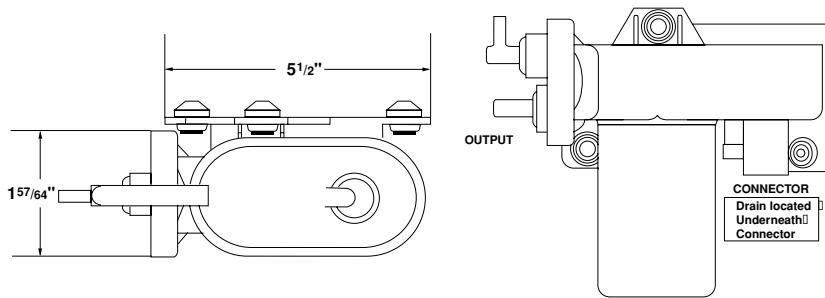

Female Terminal 18-20 gauge 12048074

Cable Seals 12048086

Type 2: Quick Connect Terminals

6.3 mm (.250") female quick connect terminal

Hella part number 701235033 or 701235034 (order 2 per vacuum pump)

Part No.

009428081

UP28 Electric Vacuum Pump (Single)

Applications:

Designed to supplement diesel engines in controlling heating and cooling functions, door locks, cruise controls, trunk release or any other functions controlled by vacuum.

Technical Data:

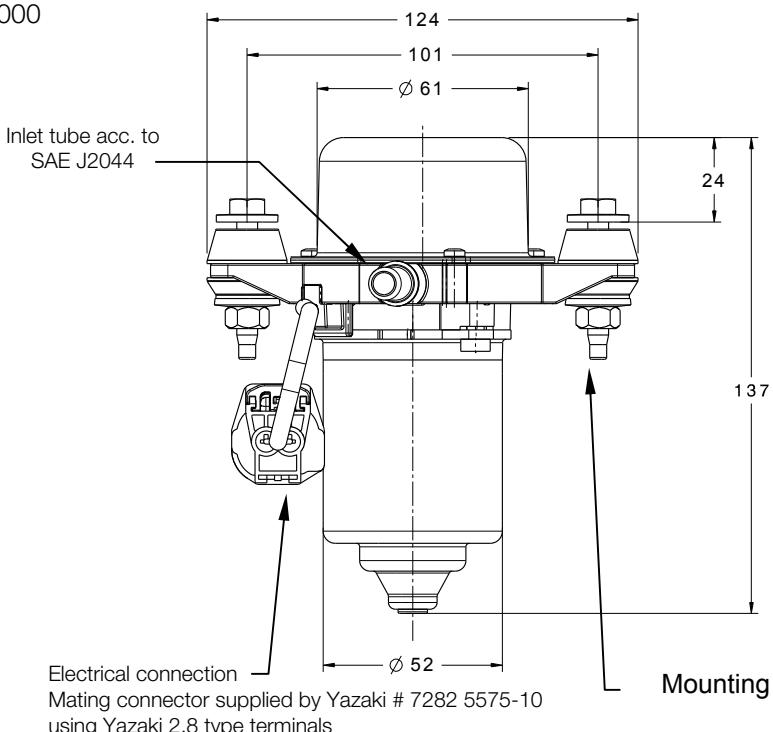

Operating Voltage: 9 V to 16 V
 Current Consumption: < 10 A at 13 V
 Operating Temperature: -40°C to +120°C
 Operating Altitude: 0 to 3000+ meters
 Maximum Vacuum Level: > 86%
 Vacuum Generation Rate: 500 mbar vac in \leq 5 sec
 700 mbar vac in \leq 10.5 sec
 Pneumatic Volume: 3.2 liter
 Operating Life: > 200 hours
 Operating Cycles: > 150,000
 Environmental Compatibility:
 water, ethylene-glycol solutions, transmission fluid,
 gasoline, diesel fuel, motor oil, DOT 3/4 brake
 fluid, solvents.
 Acoustic Noises: \leq 75 dB(A)

**Mode of Operation:**

The Hella UP28 vacuum pump requires external control for operation. A pneumatic inlet is provided, while the outlet is integrated into the pump. An electrical connector is used to receive power and ground.

Advantages:

Utilizing multiple mounting options, both on-engine and off-engine, the UP28 vacuum pump from Hella is a flexible solution for providing high pneumatic-volume supplemental vacuum. The UP28 vacuum pump provides maintenance-free, high durability, and demand oriented operation.

Part No.**009286001****UP30 Electric Vacuum Pump (Single)****Applications:**

Provides a primary vacuum source for high pneumatic-volume applications such as brake boosters in camless engines or hybrid electric vehicle applications.

Technical Data:

Operating Voltage: 9 V to 16 V
 Current Consumption: < 15 A at 13 V
 Operating Temperature: -40°C to +120°C
 Operating Altitude: 0 to 3000+ meters
 Maximum Vacuum Level: > 86%
 Vacuum Generation Rate: 500 mbar vac in 4 sec at 13V
 Pneumatic Volume: 5 liter
 Operating Life: > 1200 hours
 Operating Cycles: > 1,000,000

Environmental Compatability:

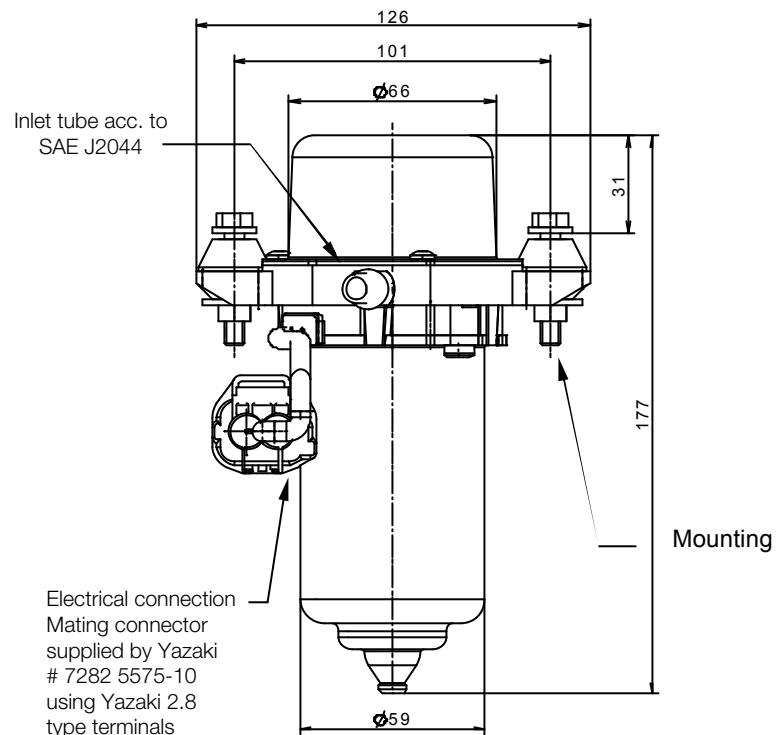

water, ethylene - glycol solutions, transmission fluid,
 gasoline, diesel fuel, motor oil, DOT 3/4 brake fluid,
 solvents.

**Mode of Operation:**

The Hella UP30 vacuum pump requires external control for operation. A pneumatic inlet is provided, while the outlet is integrated into the pump. An electrical connector is used to receive power and ground.

Advantages:

Utilizing multiple mounting options, both on-engine and off-engine, the UP30 vacuum pump from Hella is a flexible solution for providing a high pneumatic-volume primary vacuum source. The UP30 vacuum pump provides maintenance-free, high durability, and demand oriented operation.

Horn Applications

Selecting the right horn is now even easier using the simple and quick selection guide included in the new 2011 Hella Electrics Catalog. The selection guide provides the proper horn recommendations for applications ranging from small motorcycles to large buses. The guide spans Hella's wide array of horn products ranging from the compact M28 disc horn to the powerful compressed air triple horn.

Horn Retail Program

Hella's Horn Retail Program features our most popular acoustic products available in attractive display kits.

Clamshell Display Pack

- Suitable for hanging or free standing displays
- Customer can see and feel the actual product
- Dimensions of parts are visible
- Eye catching graphics

Twin Supertone Horn

Features:

- Sound Level: 118 dB
- Black Coated Metal with Red Protective Grille
- Frequency: 500 Hz High-tone/300 Hz Low-tone
- Current: 2 x 5.5 Amp

Kit includes:

One high-tone unit, one low-tone unit, relay, mounting brackets, and mounting instructions

Part No:

Supertone Kit High tone/Low tone, retail clamshell 003399803
Supertone Kit High tone/Low tone, display box 003399801

Twin Trumpet Horn

Features:

- Sound Level: 110 dB
- Frequency: 500 Hz High-tone/400 Hz Low-tone
- Current: 2 x 6 Amp

Kit includes:

One high-tone trumpet unit, one low-tone trumpet unit, relay, mounting brackets, and mounting instructions

Part No:

Twin Trumpet Horn Kit, retail clamshell 007424804
Twin Trumpet Horn Kit, display box 007424801

Universal Disc Horn

Features:

- OE replacement for various applications
- Black Diaphragm and Galvanized Metal
- Sound Level: 115 dB
- Frequency: 335 Hz Low-tone/400 Hz High-tone
- Current: 5.5 Amp

Kit includes:

One disc horn with bracket

Part No:

Universal Disc Low-Tone, retail clamshell 006958611
Universal Disc High-Tone, retail clamshell 002952013

Retail Display Box

- Compact Size
- Free standing design
- Pictures and graphics illustrate the contents

Triple-Tone Air Horn

Features:

- Sound Level: 118 dB
- Standard: 880 Hz High-tone/820 Hz Middle-tone/780 Hz Low-tone
- Melodic: 860 Hz High-tone/780 Hz Middle-tone/580 Hz Low-tone
- Melodic Horn features change-over switch on compressor for selecting melodic or triple-tone sound

Kit includes:

One triple-horn unit with high performance compressor, relay, mounting brackets, and mounting instructions

Part No:

12V Triple-Tone Air Horn Kit with Compressor, retail clamshell 003001671

12V Triple-Tone Air Horn Kit with Compressor and Melodic Sound, retail clamshell 003001681

Twin-Tone Air Horn

Features:

- Sound Level: 118 dB
- Frequency: 840 Hz High-tone/780 Hz Low-tone

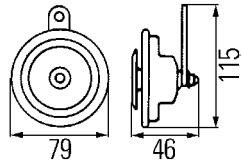

Kit includes:

One high-tone unit and one low-tone unit with high performance compressor, relay, mounting brackets, and mounting instructions

Part No:

12V Twin-Tone Air Horn Kit with Compressor, retail clamshell 003001651

24V Twin-Tone Air Horn Kit with Compressor, retail clamshell 003001661

Part No.

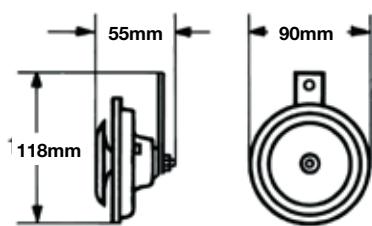

M28 Series - Disc Horn

79 mm diameter design
Includes metal bracket for M10 mounting screw
Blade type terminal contacts
Protection from moisture
Special black housing

007425427

Low - Tone Horn (Bulk 40 Pieces)

Voltage	12V
Frequency	335 Hz
Sound Level at 2 meters	110 dB
Power Consumption	72W

S90 Series - Disc Horn

90 mm diameter design
Includes metal bracket for M8 mounting screw
Blade type terminal contacts
Black housing with special red membrane

922000951

Low - Tone Horn (Single)

922000961

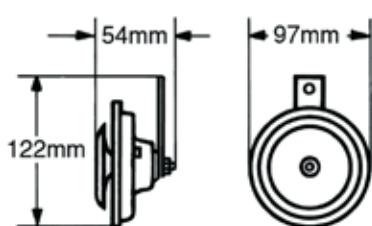

High - Tone Horn (Single)

922000971

Two Horn (High / Low Tone) Display Set (Single)

Voltage	12V
Low Tone Frequency	350 Hz
High Tone Frequency	415 Hz
Sound Level at 2 meters	113 dB
Power Consumption	42W

M26 Series - Disc Horn

97 mm diameter design

Includes metal bracket for M8 mounting screw
Blade type terminal contacts
Teflon seal protects against moisture
Special order options include alternate 6V, 12V and 24V designs and twin horn sets.

HELLA

NAVIGATOR

Signal horn B133

- Traffic Blaster, produces a piercing strong sound
- Sturdy housing in first-class design with striking grid
- Ideal for tough off-road duty

Special features

- With optional Teflon pellet as humidity protection
- High corrosion protection
- Rubber grommets available for additional water protection
- Variants with additional interference suppression available
- Optional Deutsch plug

133 mm 300 / 375 / 500 Hz 105 - 115 dB (A) 12V / 24V ECE R26: E1 050414

Horn App

Introducing the first international HELLA app. This app is available in 10 languages and is suitable for smartphones with Apple iOS and Android operating systems. It is a mobile application for HELLA horns and fanfares. The horns and fanfares app provides an acoustic comparison. The app allows the option to listen to various kinds of sounds or switch on street noises, simply by tapping on your smartphone screen. Navigating the app feels very intuitive, and is a useful tool for selecting a product.

Terminal Designations DIN 72552

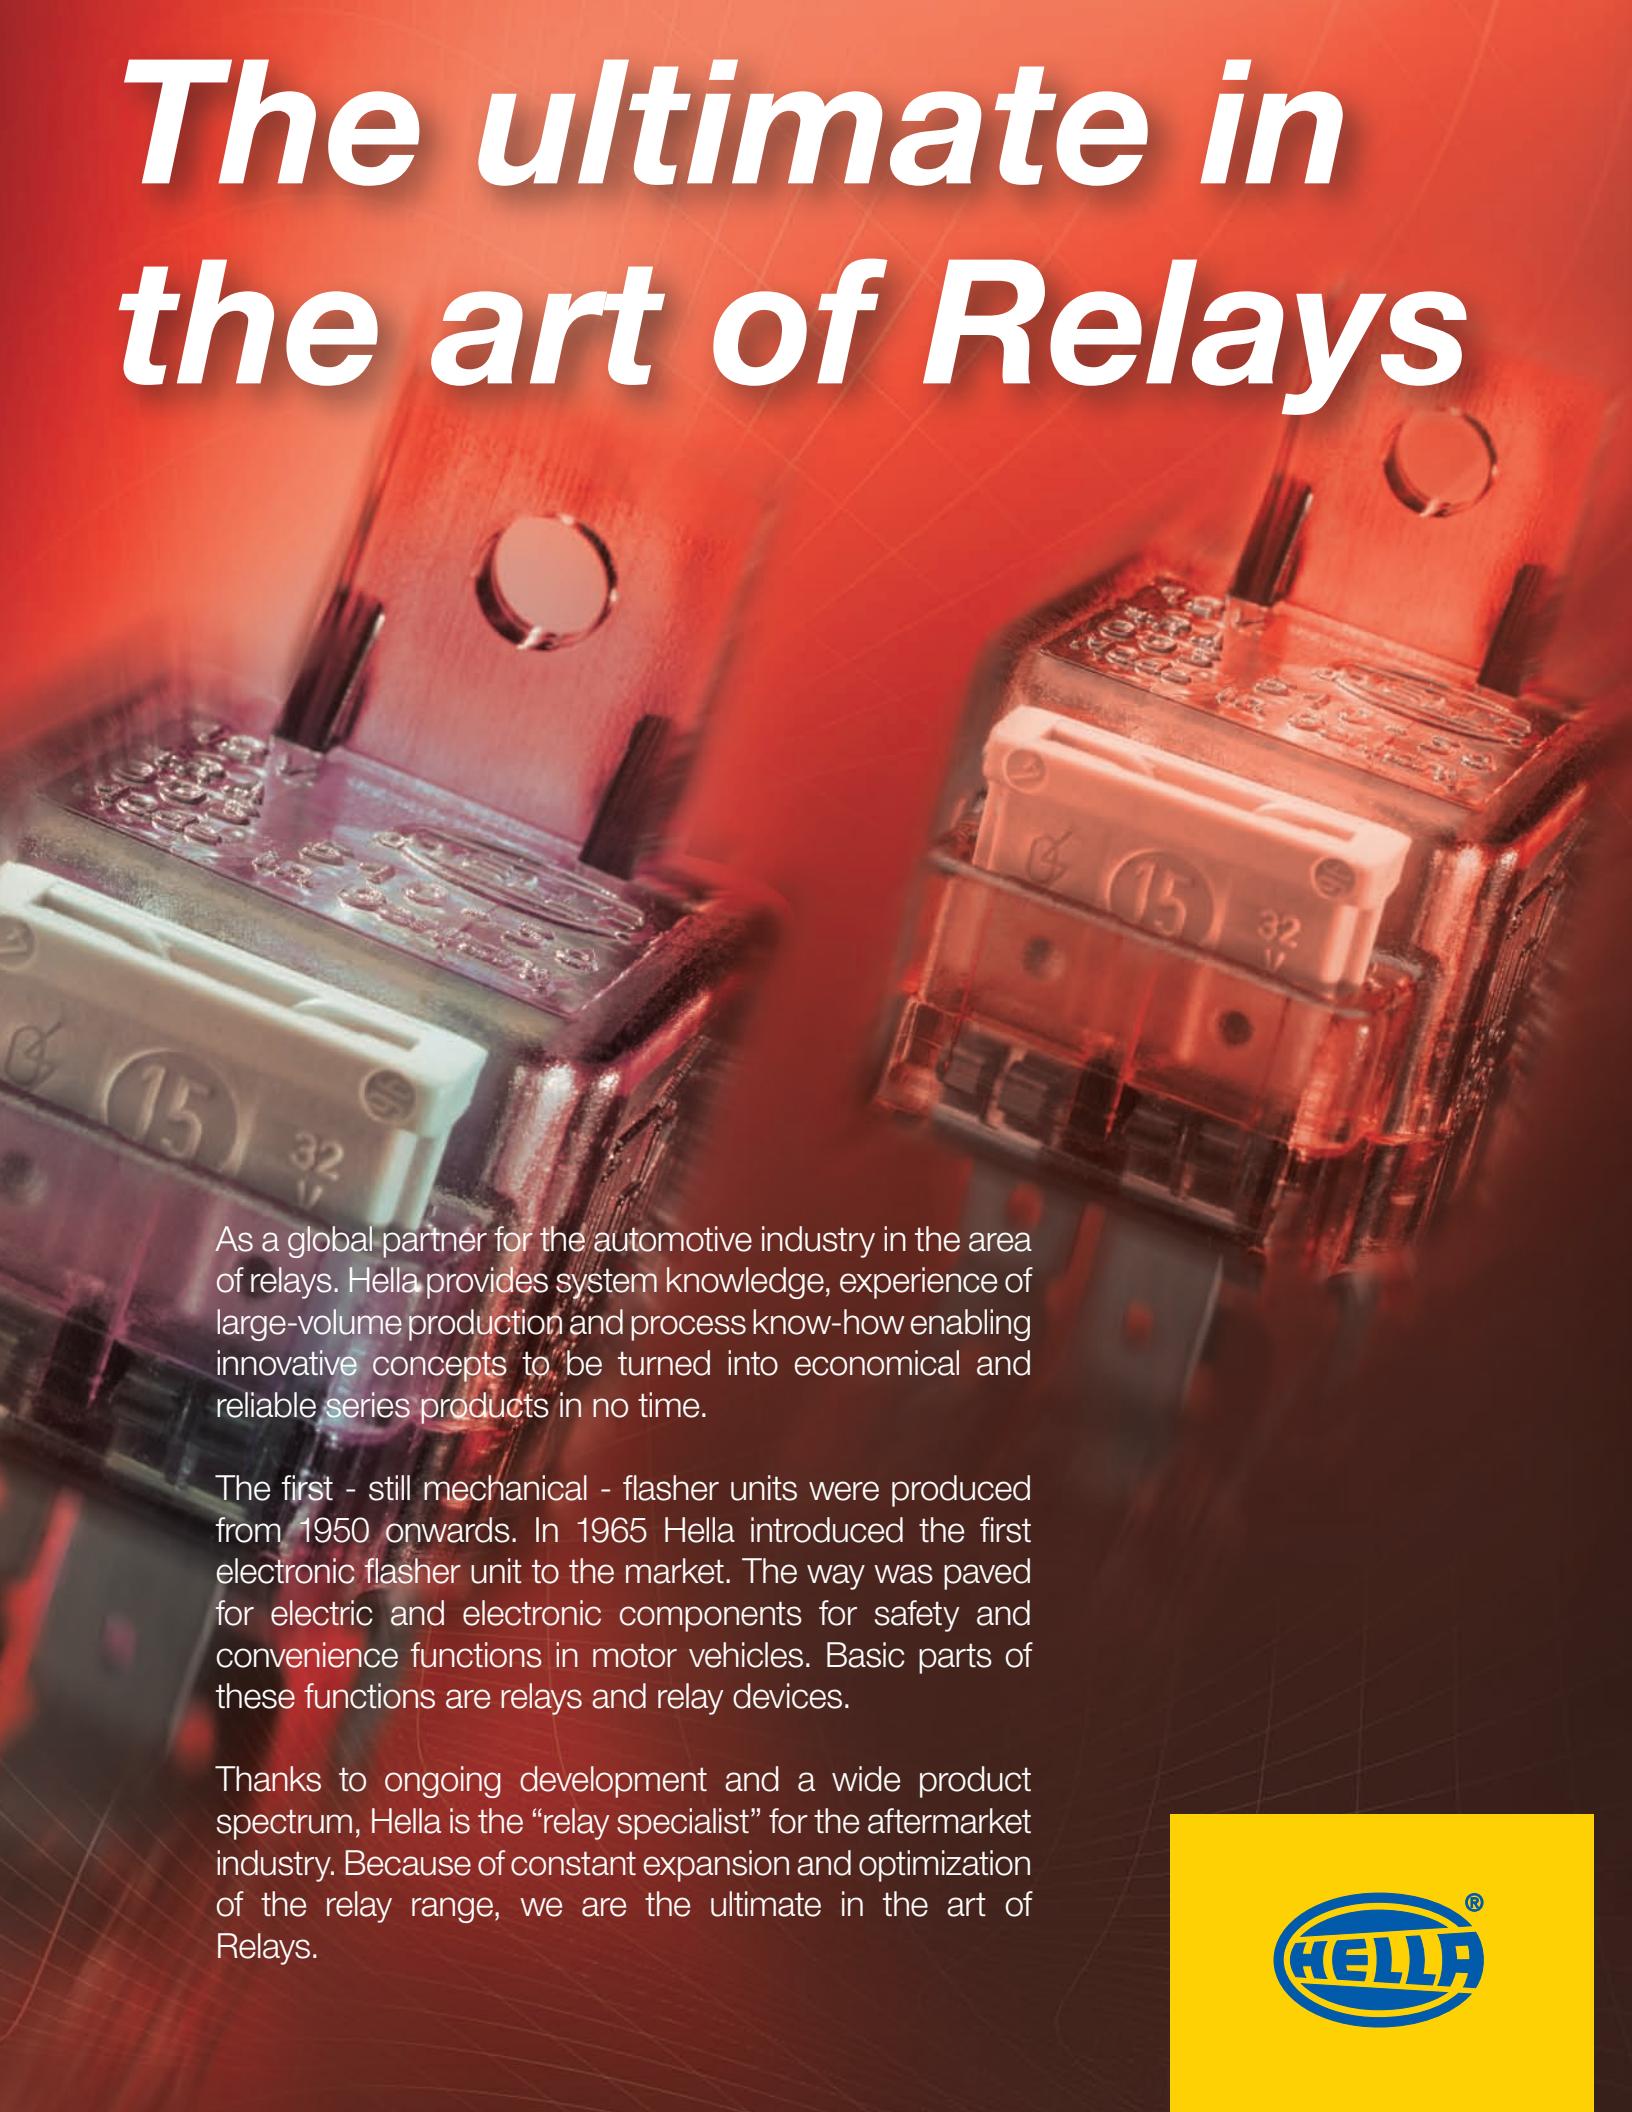

Component	Terminal	Significance
Ignition and current supply	1	Coil, distributor - low voltage
	1a	To contact breaker I (distributor with 2 separate circuits)
	1b	To contact breaker II (distributor with 2 separate circuits)
	2	Shorting circuit - magneto ignition
	4	Coil, distributor - high voltage
	4a	From coil I (distributor with 2 separate circuits)
	4b	From coil II (distributor with 2 separate circuits)
	7	Ballast resistor terminal to/from distributor
	15	Switched + downstream of battery (output of ignition/driving switch)
	15a	Output at ballast resistor to coil and starter
	17	Glow plug and starter switch - Start
	19	Glow plug and starter switch - Preheat
	30	Input from battery +, direct 12/24 V series-parallel battery switch
	30a	Input from + terminal of battery II
	31	Battery negative terminal, or ground, direct
	31a	Return line to battery II, negative (12/24 V series-parallel battery switch)
	31b	Return line to battery negative terminal, or ground via switch or relay (switched negative)
	31c	Return line to battery I, negative (12/24 V series-parallel battery switch)
	X	Battery power switched through the load reduction relay
Motors	32	Return
	33	Main terminal connection
	33a	Self-parking switch-off
	33b	Shunt field
	33f	For 2nd low-speed range
	33g	For 3rd low-speed range
	33h	For 4th low-speed range
	33L	Anticlockwise
	33R	Clockwise
Starters	45	Separate starter relay, output; starter, input (main current) Two-starter parallel operation - Starting relay for engagement current
	45a	Output, starter I, Input, starters I and II
	45b	Output, starter II
	48	Terminal on starter & on repeating relay for monitoring starting procedure
Turn-signal flashers (pulse generators)	49	Input
	49a	Output
	49b	Output, 2nd circuit
	49c	Output, 3rd circuit

Component	Terminal	Significance
Starter control	50	Starter control (direct)
	50a	Series-parallel battery switch - Output for starter control with parallel operation of two starters with sequential control
	50b	Starting relay for sequential control of the engagement current during parallel operation of two starters
	50c	Input at starting relay for starter I
	50d	Input at starting relay for starter II
	50e	Start-locking relay Input
	50f	Start-locking relay Output
	50g	Start-repeating relay Input
	50h	Start-repeating relay Output
Alternator	51	DC voltage at rectifier
	51e	DC voltage at rectifier with choke coil for daytime driving
Trailer signals	52	Additional signals from trailer to vehicle
Wiper motors	53	Wiper motor, input (+)
	53a	Wiper (+), self-parking switch-off
	53b	Wiper (shunt winding)
	53c	Electric windshield-washer pump
	53e	Wiper (brake winding)
	53l	Wiper motor with permanent magnet and 3rd brush (for higher speed)
Trailer signals (see also 52)	54	Trailer plug connections and lighting combinations, brake light
	54g	Pneumatic valve for continuous brake in trailer, solenoid-operated
Lighting	55	Fog lamp
	56	Headlamp
	56a	High beam, high-beam indicator lamp
	56b	Low beam
	56d	Headlamp-flasher
	57a	Parking lamp
	57L	Parking lamp, left
	57R	Parking lamp, right
	58	Side-marker, tail, numberplate and instrument panel lamps
	58b	Taillight changeover for two-wheeled tractors
	58c	Trailer plug and receptacle assembly for single-conductor taillight with fuse in trailer
	58d	Variable intensity instrument panel light, tail light and side marker.
	58L	Numberplate lamp, left
	58R	Numberplate lamp, right

Component	Terminal	Significance
Alternators and voltage regulators	59	A/c voltage output, rectifier input
	59a	Charging armature, output
	59b	Tail light armature, output
	59c	Brake light armature, output
	61	Alternator charge-indicator lamp
	B+	Battery +
	B-	Battery -
	D+	Dynamo +
	D-	Dynamo -
	DF	Dynamo field
	DF1	Dynamo field 1
	DF2	Dynamo field 2
	U,V,W	Three-phase alternator terminals
Multi-tone horn and emergency lights	71	Input
	71a	Output to horns 1 & 2 low
	71b	Output to horns 1 & 2 high
	72	Alarm switch - revolving emergency light
Radio, cigarette lighter	75	Radio, cigar lighter
	76	Speakers
	77	Door valve control
Normally closed and changeover switches	81	Input
	81a	Output 1, NC side
	81b	Output 2, NC side
Normally open switches	82	Input
	82a	Output 1
	82b	Output 2
	82z	Input 1
	82y	Input 2
Multi-position switches	83	Input
	83a	Output, position 1
	83b	Output, position 2
	83L	Output, left-hand position
	83R	Output, right-hand position
Current relays	84	Input, actuator and relay contact
	84a	Output, actuator
	84a	Output, relay contact

Component	Terminal	Significance
Switching relays	85	Output, actuator (end of winding to ground or negative)
	86	Input, actuator (start of winding)
	86a	Start of winding or 1st winding
	86b	Winding tap or 2nd winding
Relays - N/C and changeover	87	Input
	87a	Output 1(NC side)
	87b	Output 2
	87c	Output 3
	87z	Input 1
	87y	Input 2
	87x	Input 3
Relays - N/O and changeover	88	Input
	88a	Output 1
	88b	Output 2
	88c	Output 3
	88z	Input 1
	88y	Input 2
	88x	Input 3
Directional signals	C	Indicator lamp 1
	C2	Indicator lamp 2
	C0	Main connection for separate indicator circuits worked by turn signal switch
	C3	Indicator lamp 3 (e.g., when towing two trailers)
	L	Turn-signal lamps, left
	R	Turn-signal lamps, right

The ultimate in the art of Relays

As a global partner for the automotive industry in the area of relays. Hella provides system knowledge, experience of large-volume production and process know-how enabling innovative concepts to be turned into economical and reliable series products in no time.

The first - still mechanical - flasher units were produced from 1950 onwards. In 1965 Hella introduced the first electronic flasher unit to the market. The way was paved for electric and electronic components for safety and convenience functions in motor vehicles. Basic parts of these functions are relays and relay devices.

Thanks to ongoing development and a wide product spectrum, Hella is the "relay specialist" for the aftermarket industry. Because of constant expansion and optimization of the relay range, we are the ultimate in the art of Relays.
