## Cars with SRS (Airbag)/SIPS bag/IC (Inflatable curtain)

### **Warning!**

Vehicles equipped with SRS/SIPS bag/IC must be handled with extra care when making repairs. This avoids:

1. Personal injuries when performing repair work.
2. Damage or malfunction of the SRS/SIPS bag/IC system.

Work involving the SRS/SIPS bag/IC systems or other components in the vehicle that may affect the SRS/SIPS bag/IC systems must always be performed by an authorized Volvo workshop.

In case of doubt, consult the SRS and SIPS bag/IC service manual.

### **Is the vehicle equipped with SRS/SIPS bag/IC?**

Vehicles with SRS are most easily recognized by the letters SRS in the center of the steering wheel. If the vehicle has a passenger side airbag, the letters SRS are stamped on the dashboard above the glove compartment. SRS Vehicles from 1993 and onward also have explosive seat belt tensioners. SIPS bags are only installed on SRS Vehicles from 1995 and onward. SIPS bag decals are located on the windshield and seat compartment. Vehicles with IC can be recognized by the letters IC on the C/D panel (4 door) or the B panel (5 door).

### **General recommendations**

- Be especially careful when working on or around SRS, SIPS, and IC components.
- Make sure that no wires are pinched, frayed, or pierced.
- Never install accessories by the sensors.
- Where applicable, work on the steering wheel, steering shaft, or steering gear must be done in accordance with the methods in the SRS section of VADIS.
- Certain components of the aforementioned systems must be grounded while working. Read the appropriate sections in VADIS.
- Install no accessories in the areas between the A and B posts, the B and C posts, and the C and D posts.

### **Test terminal**

Data link connector in the passenger compartment.

### **Modifications introduced up to March 2003.**

**Any changes made to the vehicles after this date are not included in the manual. If necessary refer to service bulletins.**

Volvo models are sold in versions adapted for different markets. These adaptations depend on factors such as legal requirements, taxation, and market demands.

This manual may therefore include illustrations and text that do not apply to the vehicles in your country.

# How to use the wiring diagrams

The descriptions below apply in general to all wiring diagram manuals, although not all sections are necessarily contained in this manual.

## A. Component designation

Every component has a component designation that consists of two parts.

The first part is a type number that describes the type of component in question, for example 3/xx.

The second part of the designation is a serial number, for example, x/2.

Combined these give a component designation, for example, 3/2.

At the end of the manual is a list of components, where, with the help of the component designation, you can read off the name of the component, for example, 3/2 = light switch.

## List of type numbers

The list shows which type of component that respective type numbers refer to, for example, 3/x = switch, 6/x = electric motor, etc.

1	Battery
2	Relay
3	Switch
4	Control module
5	Driver information module
6	Electric motor
7	Sensor
8	Actuator
9	Heating element
10	Light
11	Fuse
15	Distribution rail
16	Audio
17	Service/diagnostics
18	Contact reel
19	Meter
20	Ignition component/shunt
31	Ground connection
43	Junction point
44	Connector

## B. Junction points

The wiring diagrams contain numbered junction points, e.g. 43/352.

This manual contains a section with a list of junction points. This list shows all the components which are connected to each junction point.

The location of the junction points is shown in the "Cable harness routing in vehicle" section.

## C. Connectors

Connectors provide a bridge between two cables harnesses and are described in the "Connectors" section.

## D. Electrical distribution

Operation of the fuses and relays is shown in the "Electrical distribution" section.

## E. Data communication

Today's cars are equipped with a CAN network, which transmits information. Connections to this network are shown in their entirety on the respective wiring diagrams. Complete information on CAN communication is can be found in the section titled "Data communication".

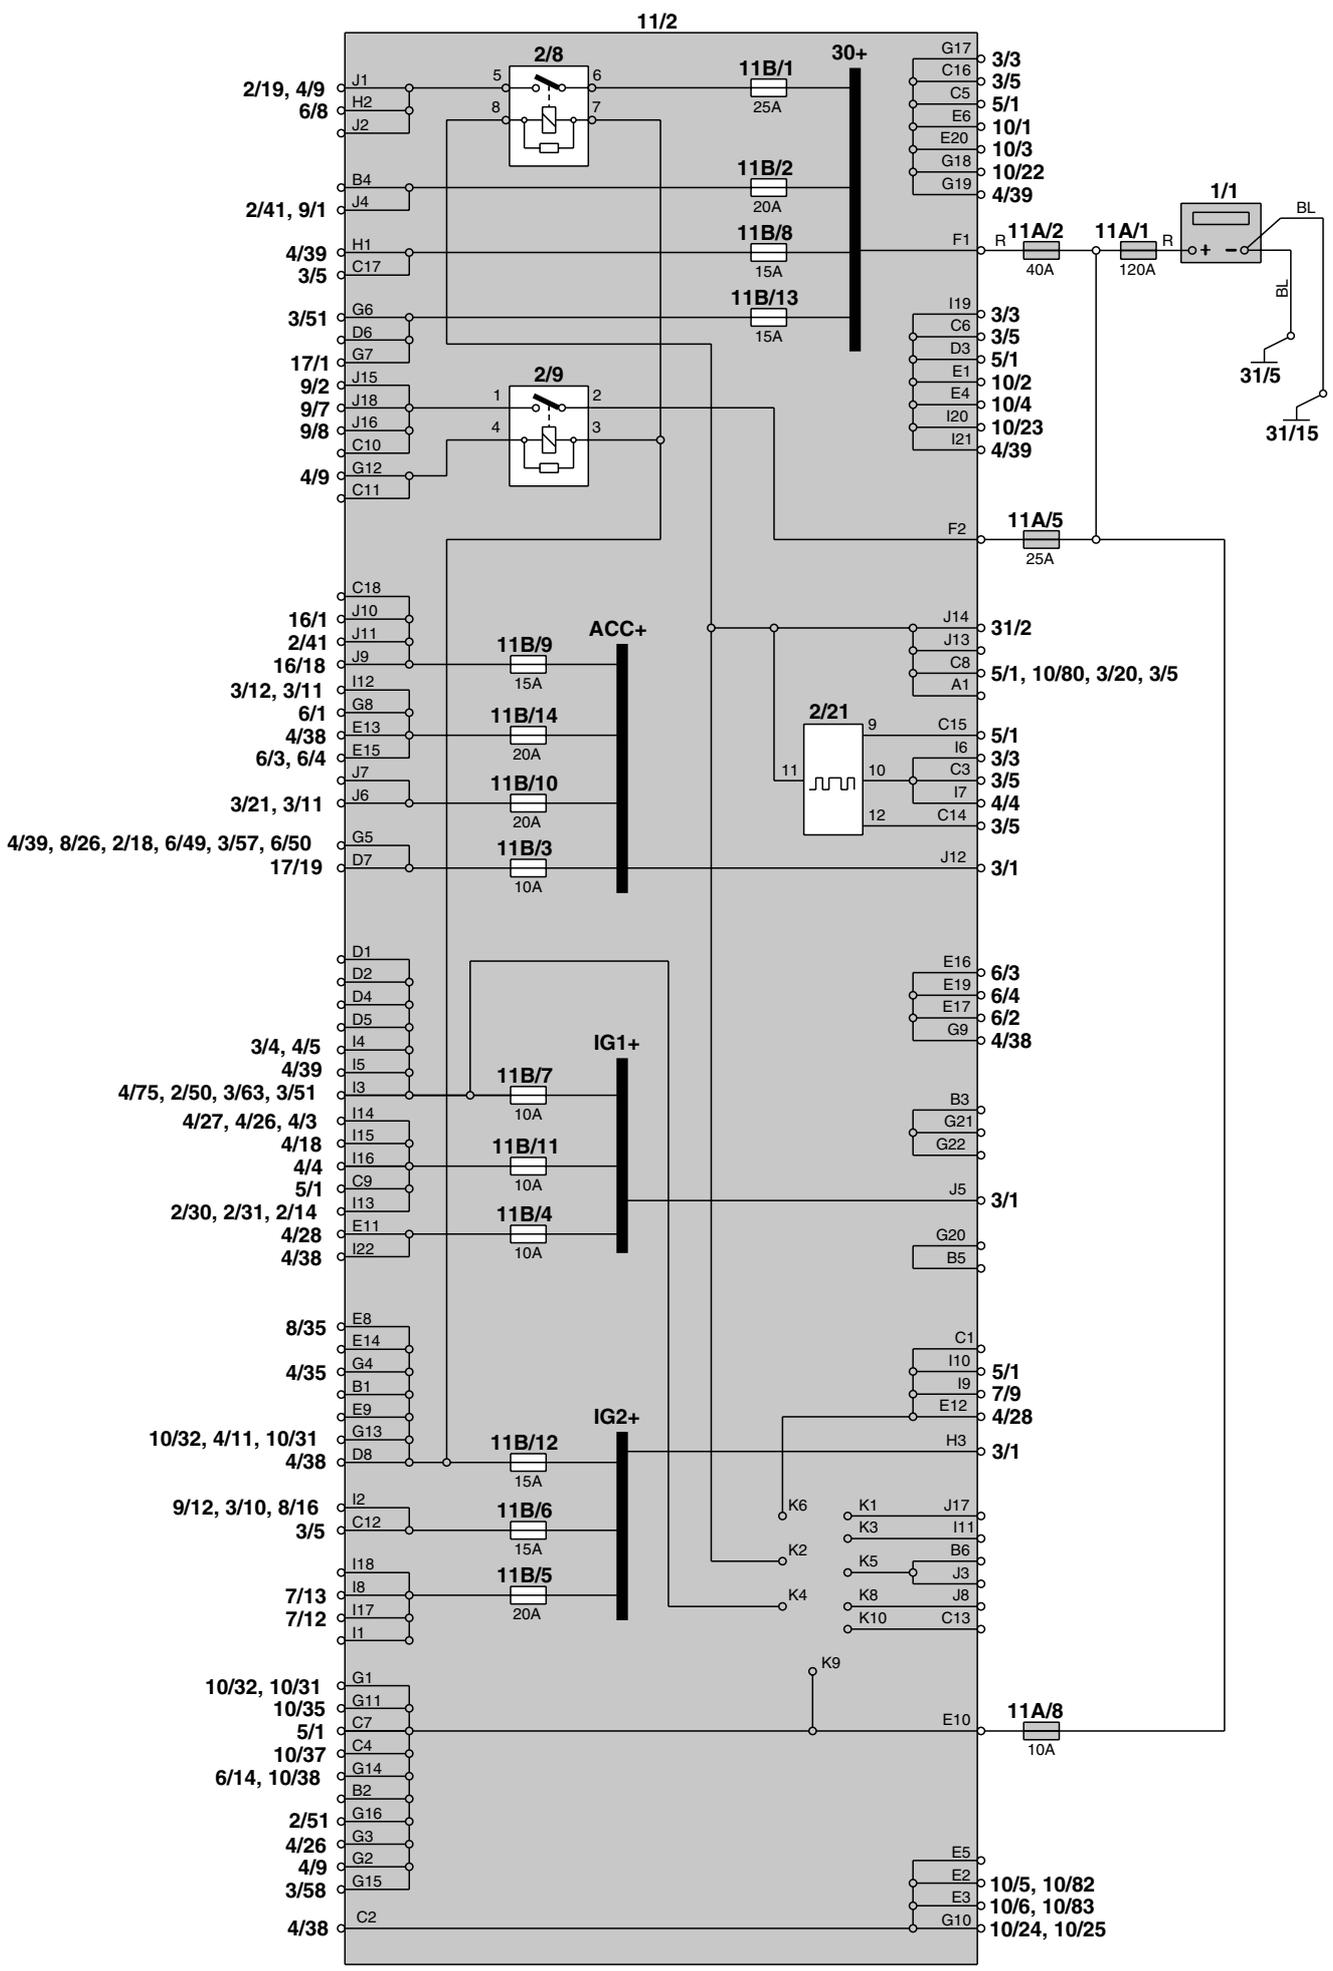

## F. Abbreviations

A number of different abbreviations are used in the manual. These are explained in the section "Abbreviations".

## G. Component location

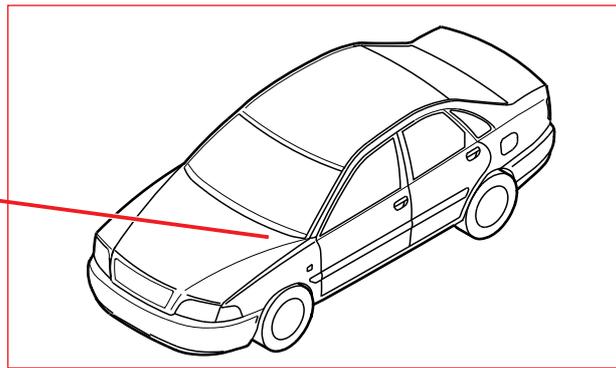

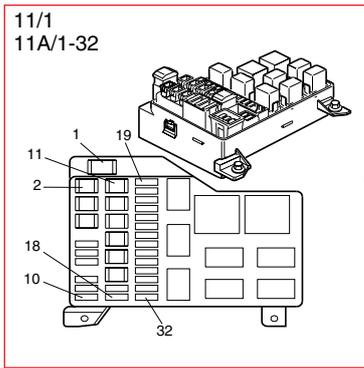

There is a section at the end of the manual in which the appearance and location of components is described in numerical order.

15/4 Distribution rail, central locking		
C1	4/39_B:2	Control module for locks and alarm, VGLA
C2	6/55:1	Lock motor, fuel filler flap, EU/OS
	6/32:2	Central locking, trunk lid/tailgate
C3	6/30:2	Central locking, rear driver's side door
	6/38:1	Central locking with deadlock, driver's side, rear
C4	6/31:2	Central locking, rear passenger side
	6/39:1	Central locking with deadlock, passenger side, rear
C5	6/28:2	Central locking, driver's door
	6/36:1	Central locking with deadlock, driver's door
C6	6/29:2	Central locking, passenger door
	6/37:1	Central locking with deadlock, passenger door

15/5 Distribution rail LHD USA, KOR		
C8	4/35:3	Control module, key-inserted warning/seat belt reminder
C9	3/27:1	Driver's door contact
C10	4/39_A:23	Control module for locks and alarm, VGLA

15/6 Distribution rail, ground connections		
D1	3/25:5	Switch, child safety lock
D3	31/1	Ground connection
D4	3/14:1	Switch, brake pedal, cruise control, Diesel, Melco 2, USA
	3/63:1	Switch, gas/gasoline, LPG
	3/57:1	Switch, retractable door mirrors
D5	3/3:3	Switch, direction indicators/high and low beams
D6	17/1:4	Data link connector
D7	17/1:5	Data link connector
D8	4/9:1.8	Climate Control Module (CCM)
D9	4/18:8	Control module, electronic immobilizer
D10	4/5:10	Control module, cruise control

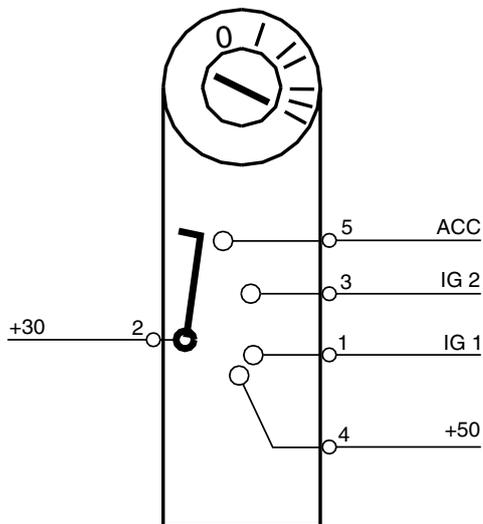

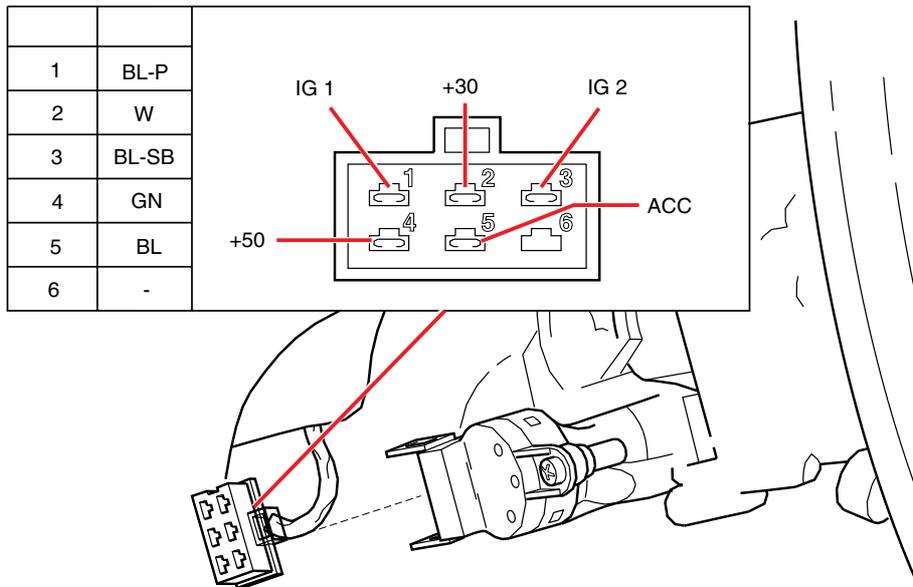

## Distribution rails 15/7 - 15/8

15/7 Distribution rail, diagnostics system		
E1	5/1_B:3	Driver information module
E3	4/4:75	Control module, Supplemental Restraint System (SRS)
E4	4/18:3	Control module, electronic immobilizer
E5	4/39_B:19	Control module for locks and alarm, VGLA
E6	4/27:13 4/3:14 4/26_C:15 4/75_J1:31	Transmission Control Module TCM Control module, Dynamic Stability Assistance (DSA) Engine management system, Melco 2 Control module LPG
E7	4/38_B2:7	Central Electronic Module CEM
E8	17/1:7 4/6:5	Data link connector Control module, xenon lamps
E9	4/28:11	ABS control module
E10	4/9:1.30	Climate Control Module (CCM)

15/8 Distribution rail, ground connections		
F1	3/23:2	Switch, reduced alarm
F3	31/1	Ground connection
F4	9/8:5 6/50:5 3/34:3 3/37:3	Heated door mirror, passenger door Retractable passenger door mirror Switch unit, passenger door power window Switch, central locking, passenger door
F5	7/40:5	Vehicle inclination sensor
F6	4/41:5	Control module, ultrasonic glass breakage sensor
F7	3/15:1 4/35:2	Clutch pedal contact, cruise control Diesel, Melco 2 Control module, key-inserted warning/seat belt reminder, USA, KOR
F8	2/41:2	Relay, front 12V socket, USA, CDN, AUS
F10	4/40:4	Receiver, VGLA
F11	2/18:2	Relay, power windows
