# Fuses

# How to use the Diagrams

First find the page number of the component you wish to locate: the index is at the back of the manual.

If, for instance, you want to look at the breakerless ignition system on a 240, turn to page 26.

Here you can see how the components are connected, and the circuit diagram.

## List of components

### Breakerless electronic ignition system, 240

- A Control unit
- B Ballast resistor
- C Ignition switch
- D Distribution switch
- E Ignition coil
- F Fusebox

- G Connector
- H Connector
- J Connector
- K Connector
- L Ground connector

All circuits protected by fuse(s) are so indicated.

## Fault tracing

Use a test lamp with a pointed probe to ensure good contact.

## Color code

|            |            |             |
|------------|------------|-------------|
| SB = black | BN = brown | GN = green  |
| GR = gray  | Y = yellow | OR = orange |
| W = white  | P = pink   | VO = violet |
| R = red    | B = blue   |             |

— without current potential

— current potential lower than circuit potential

129 077

Current flows through control unit and ignition coil is energized

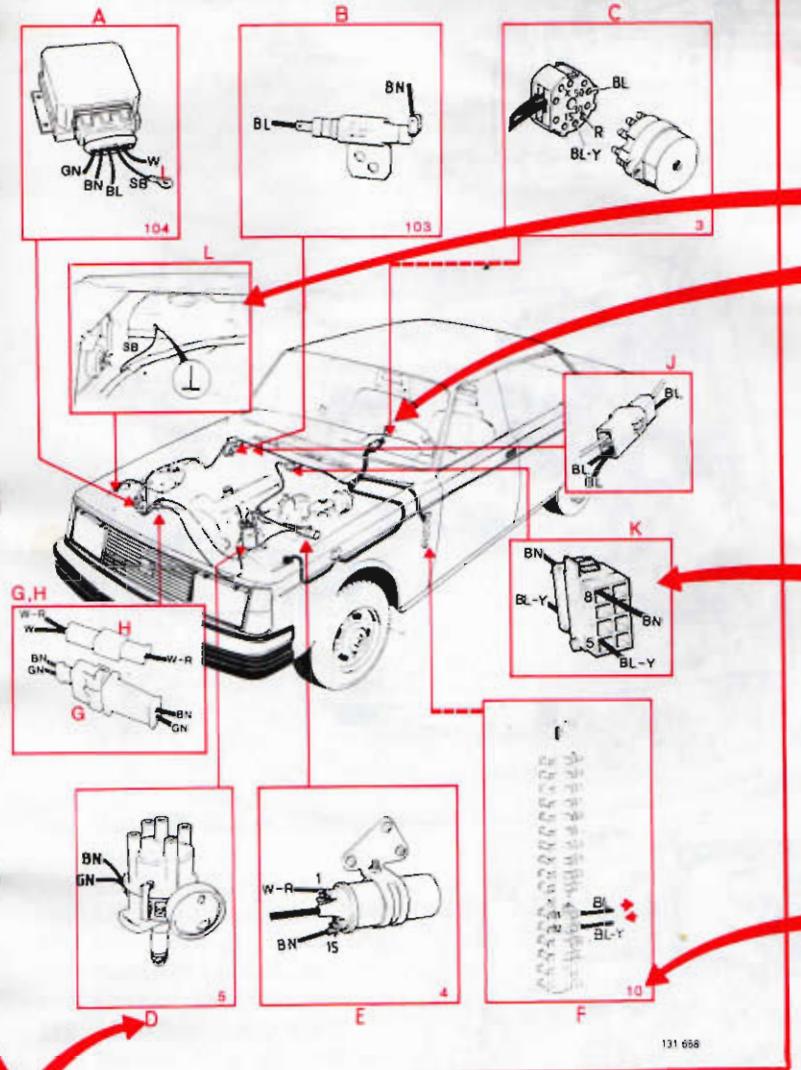

Control unit interrupts current flow and ignition coil discharges

Current flow when circuit is live.

# How to use the Diagrams

On the right hand side of the page you can see where the components are located and how the wires are routed.

Breakerless electronic ignition system, 240

The    symbol indicates a hidden earth/ground connection.

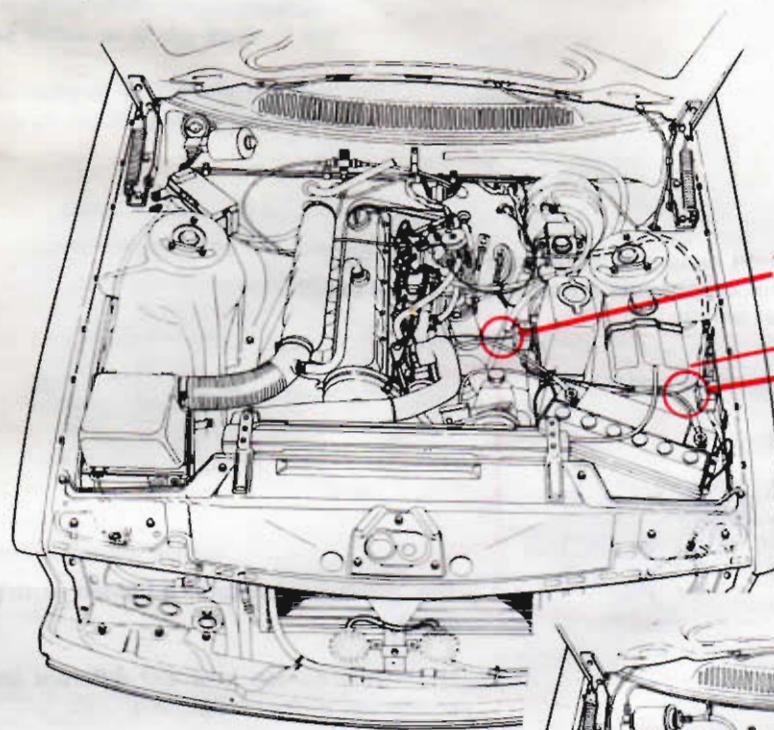

Here you can see how the different leads are connected to the component.

Connectors are also shown.

Use the number at the bottom right to find the component in the general wiring diagrams at the back of the manual.

Look for the letter when checking the circuit diagram.

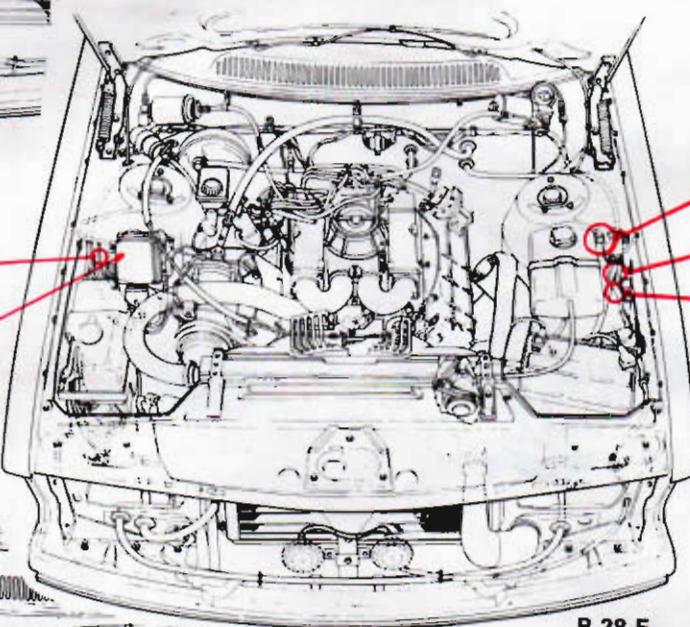

# Relays

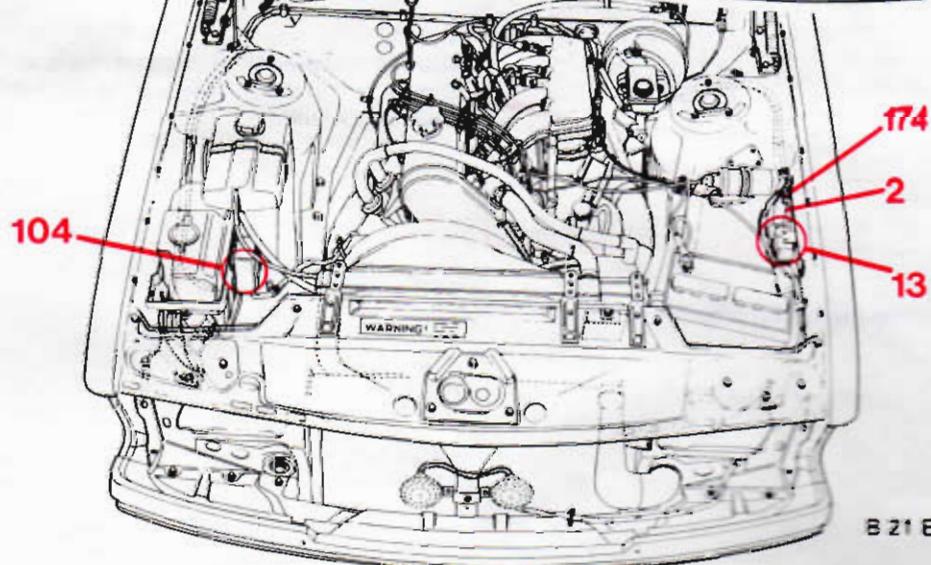

- 2 Junction box
- 13 Step relay for main/dipped (high/low) beams
- 165 Glow plug relay
- 168 Electric cooling fan relay

D 24

- 104 Ignition system control unit
- 211 Start injector impulse relay

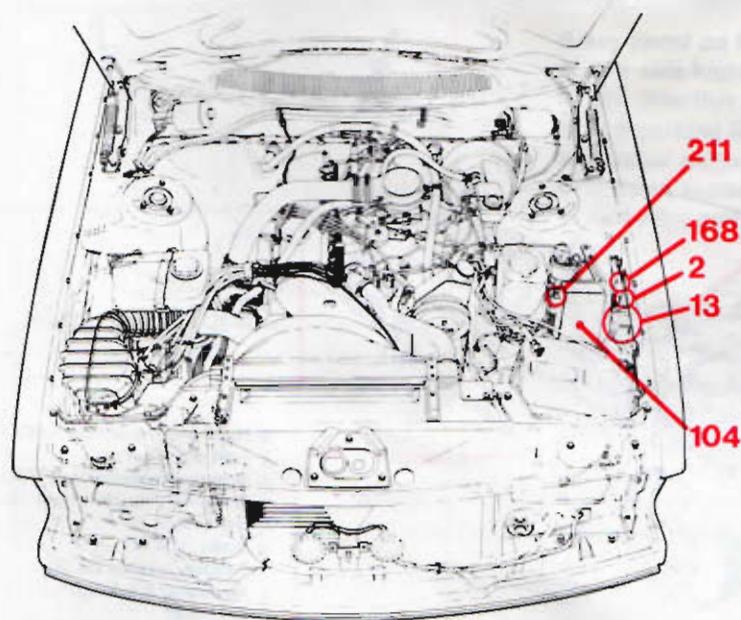

B 28 E

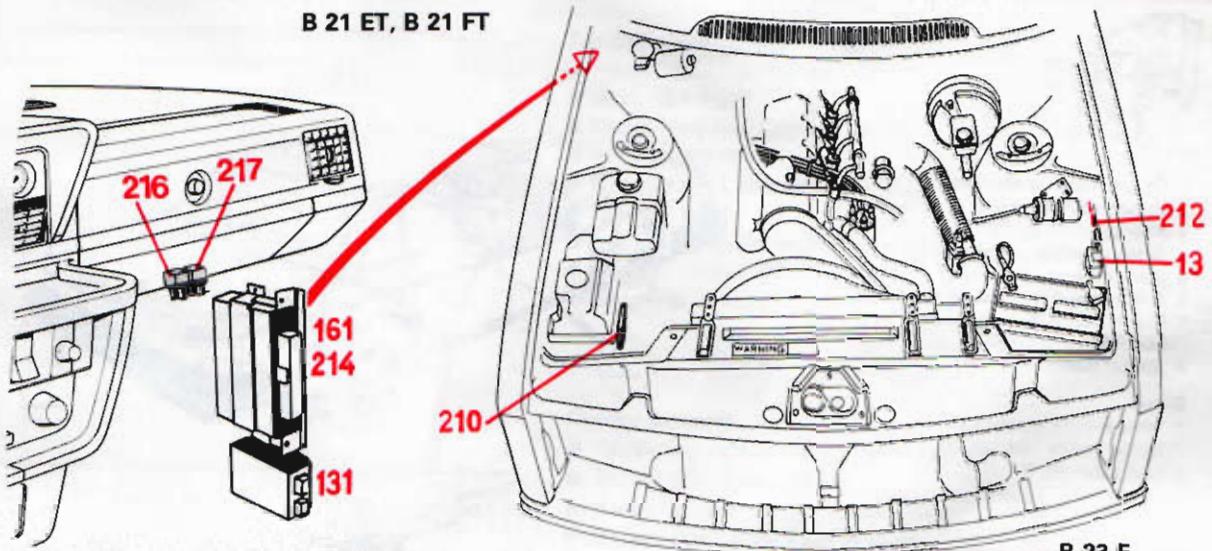

B 21 E

# Relays

- 2 Junction Box  
 12 Bulb failure warning sensor  
 13 Step relay for main/dipped (high/low) beams  
 28 Relay for direction indicators  
 67 Warning buzzer  
 94 Fasten seat belt light  
 99 Fuel pump relay (Turbo)  
 104 Ignition system control unit  
 108 Overdrive relay  
 126 Electric window relay  
 129 Air conditioning relay  
 131 Constant idle speed system (Turbo)  
 148 Windshield wiper interval relay  
 159 Lambda sond relay  
 161 Control unit, Lambda sond system  
 163 Tailgate wiper interval relay  
 164 Control unit, preheating, diesel  
 167 Relay, delayed courtesy light  
 168 Electric cooling fan relay  
 175 Time-delay relay, heated rear window (USA)  
 188 Relay for central locking system, unlocking

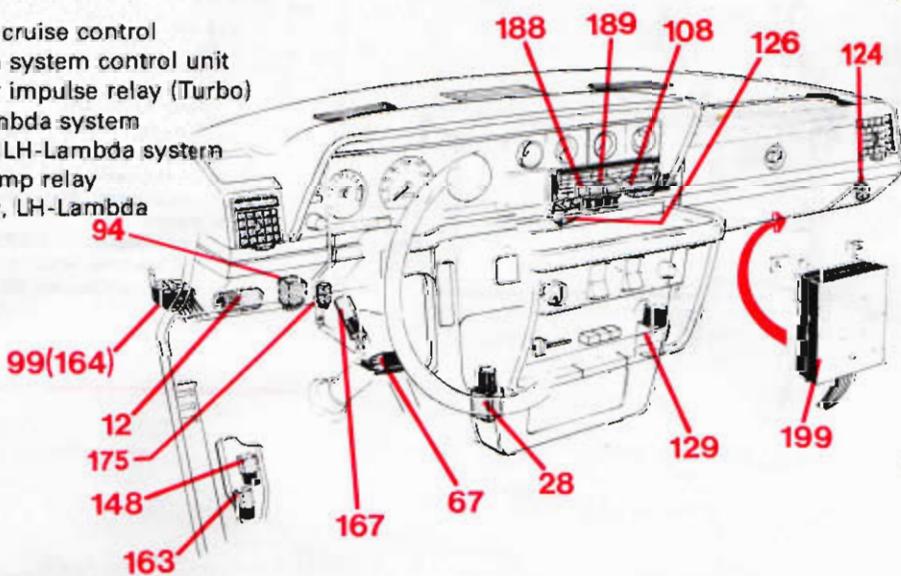

B 21 ET, B 21 FT

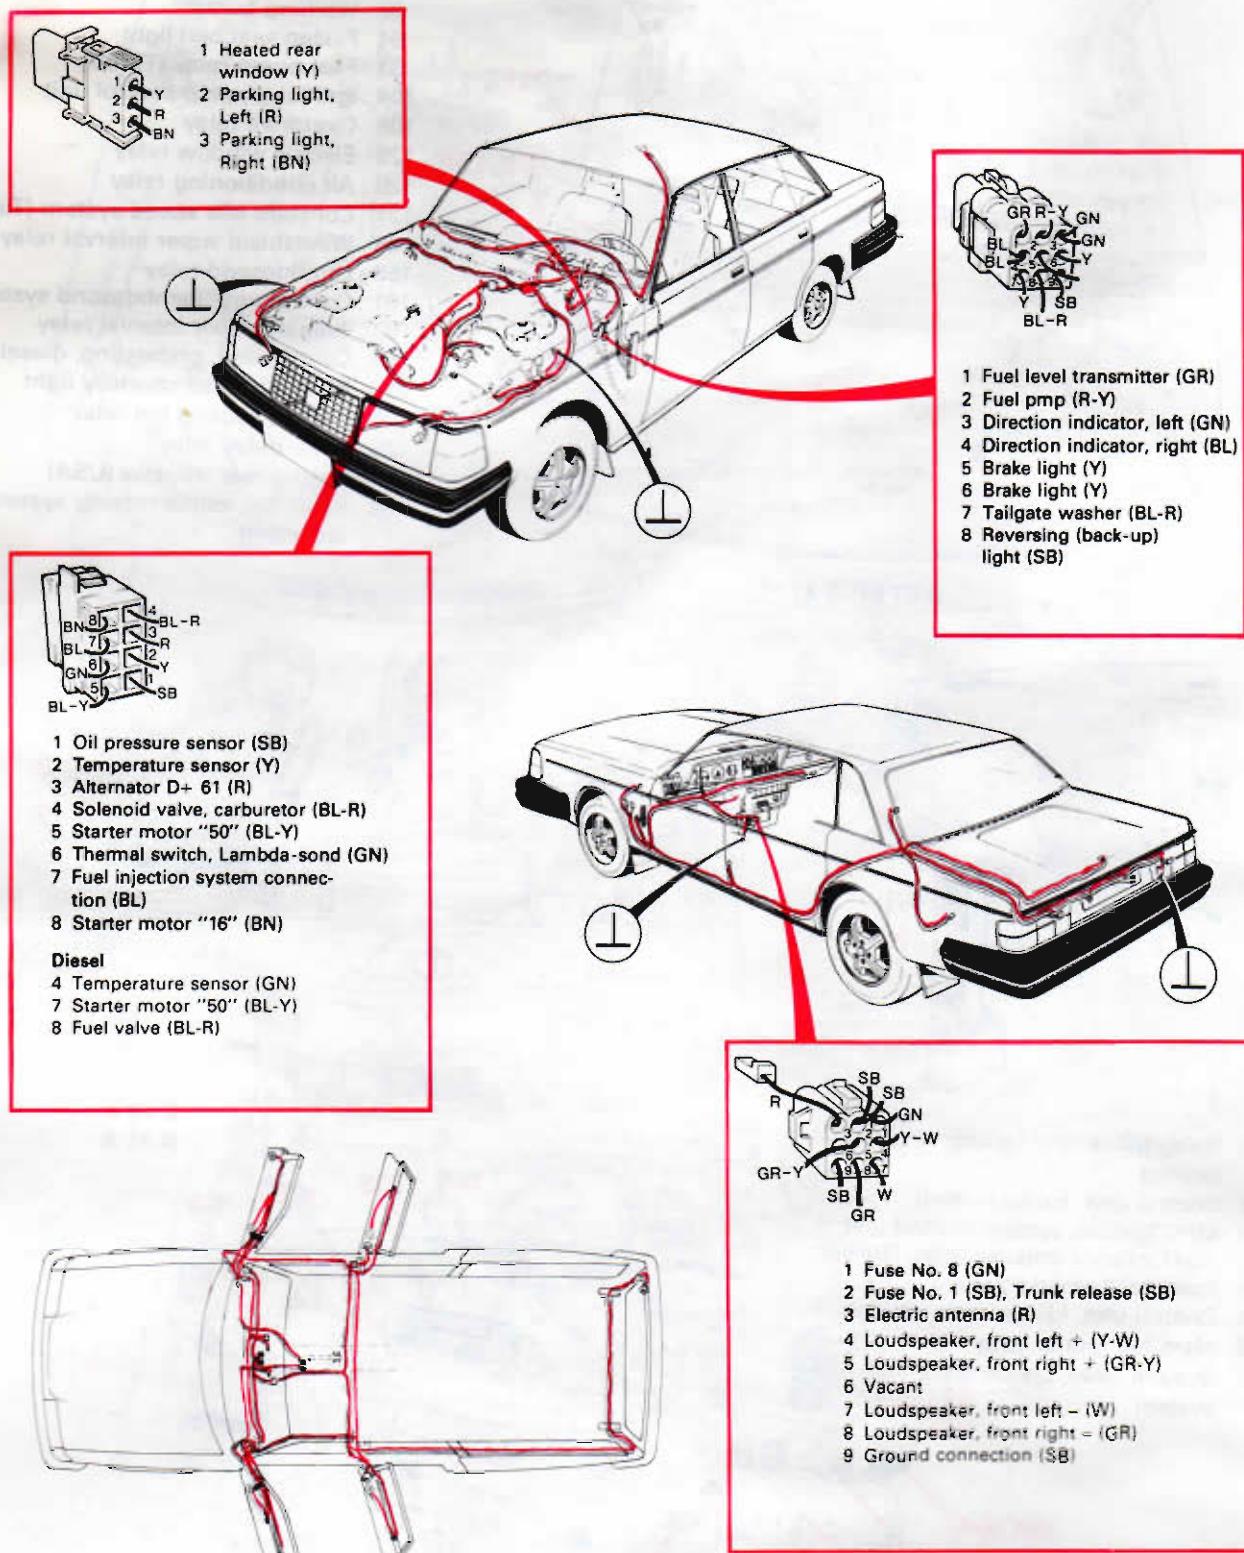

B 23 F,  
B 21 A

- 189 Relay for central locking system, locking  
 199 Control unit, cruise control  
 210 MPG ignition system control unit  
 211 Start injector impulse relay (Turbo)  
 212 Fuse, LH-Lambda system  
 214 Control unit, LH-Lambda system  
 216 Main fuel pump relay  
 217 System relay, LH-Lambda system

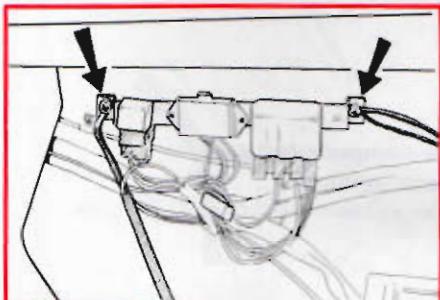

# Cable (wiring) harness and connectors

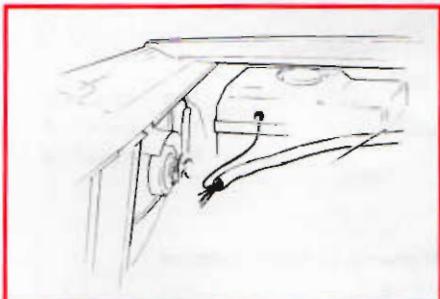

# Ground connections

Shown below and on the following pages are the main ground connections and the components which they ground.

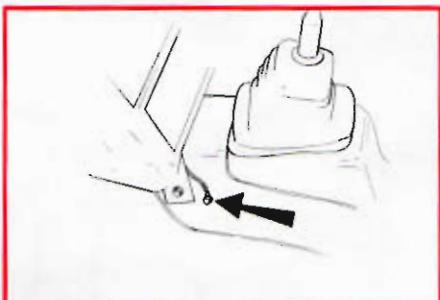

## Relay panel on left side of engine compartment

- Left side high/low beam
- Left direction indicator
- Left parking light
- Washer motors for turbo and diesel models
- Ignition system control, turbo
- Relay for preheating circuit, diesel

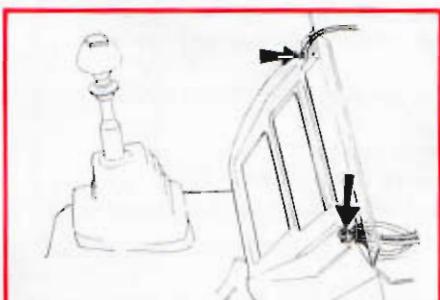

## Wheelhousing, front right

- Right high/low beam
- Right direction indicator
- Right parking light
- Right day running light
- Ignition system control unit

## Tunnel, next to gear lever

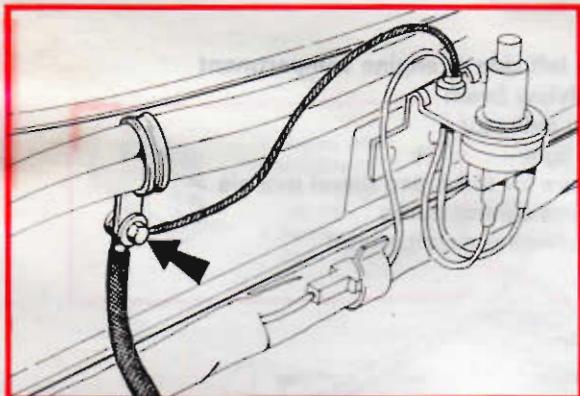

- Horn
- Seat belt light
- Combined instrument panel
- Fuel pump relay
- Control unit, diesel
- Flasher relay
- Switch, tailgate wiper
- Radio
- Steering column

## Center console

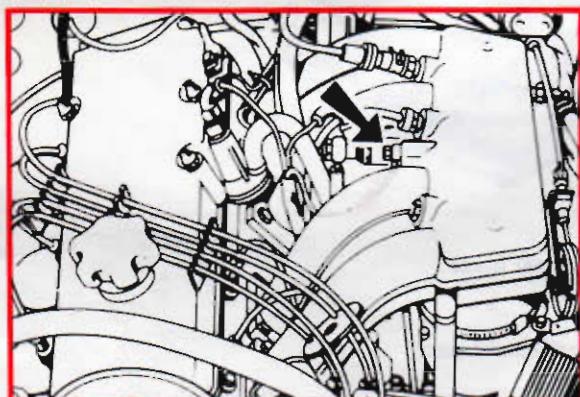

- Relay, air conditioning unit
- Relay, window motors
- Relay, overdrive
- Relay, central locking system
- Heater fan, CU heater

# Ground connections

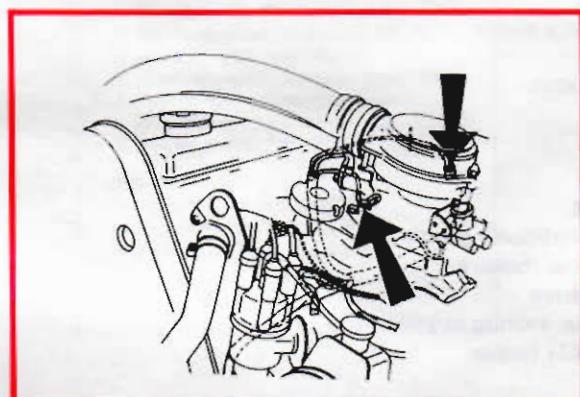

**Bulkhead, engine compartment side**

- Radio suppressor ground
- Charge air overpressure switch, B 21 F-Turbo

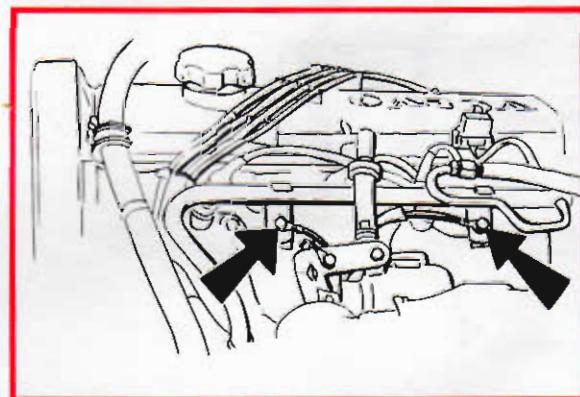

**4-cyl. E- and F-engines, CI fuel injection**

- Auxiliary air valve
- Control pressure regulator

**4-cyl. E- and F-turbocharged engines**

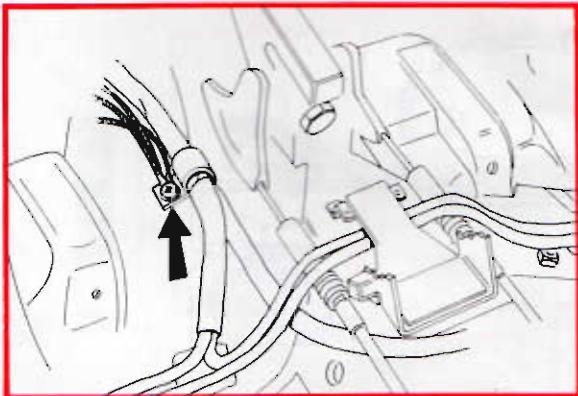

- Microswitch for constant idle speed system (F-engines)
- Control unit for constant idle speed system (F-engines)
- Control pressure regulator
- Auxiliary air valve (E-engines)
- Impulse relay, Turbo

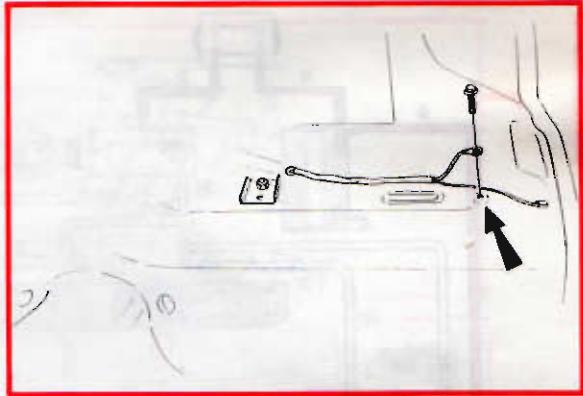

**B 23 F LH-Jetronic II**

- Ignition system control unit
- LH-Jetronic control unit
- Air mass meter

# Ground connections

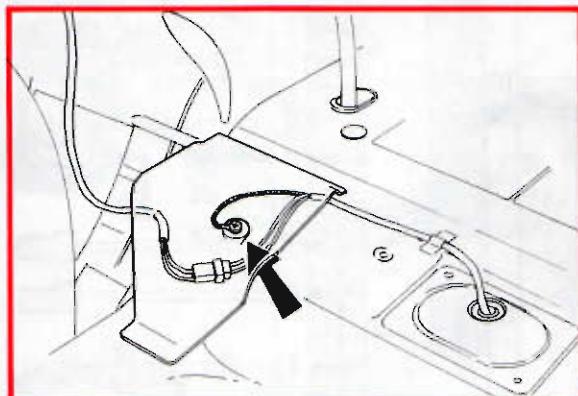

Beneath front left seat  
● Power door mirrors  
● Heated seat

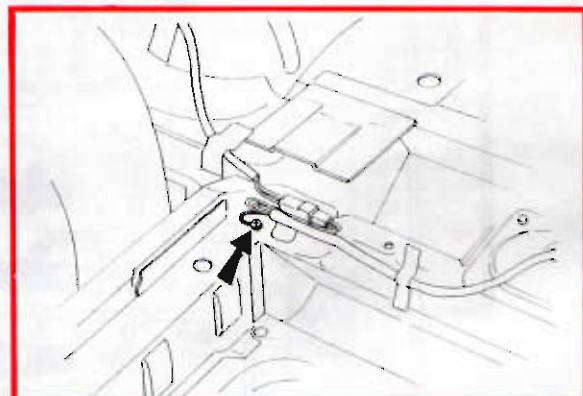

Beneath rear seat  
● Fuel pump

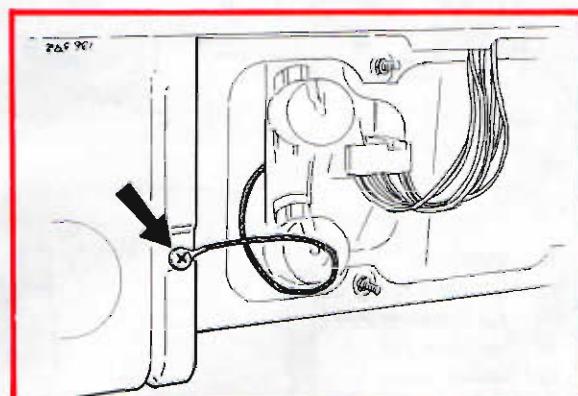

## Ground connections in trunk

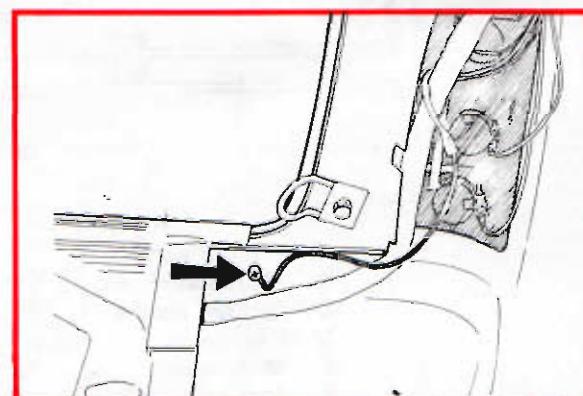

Tank pump 4-door models

Tank pump 5-door models

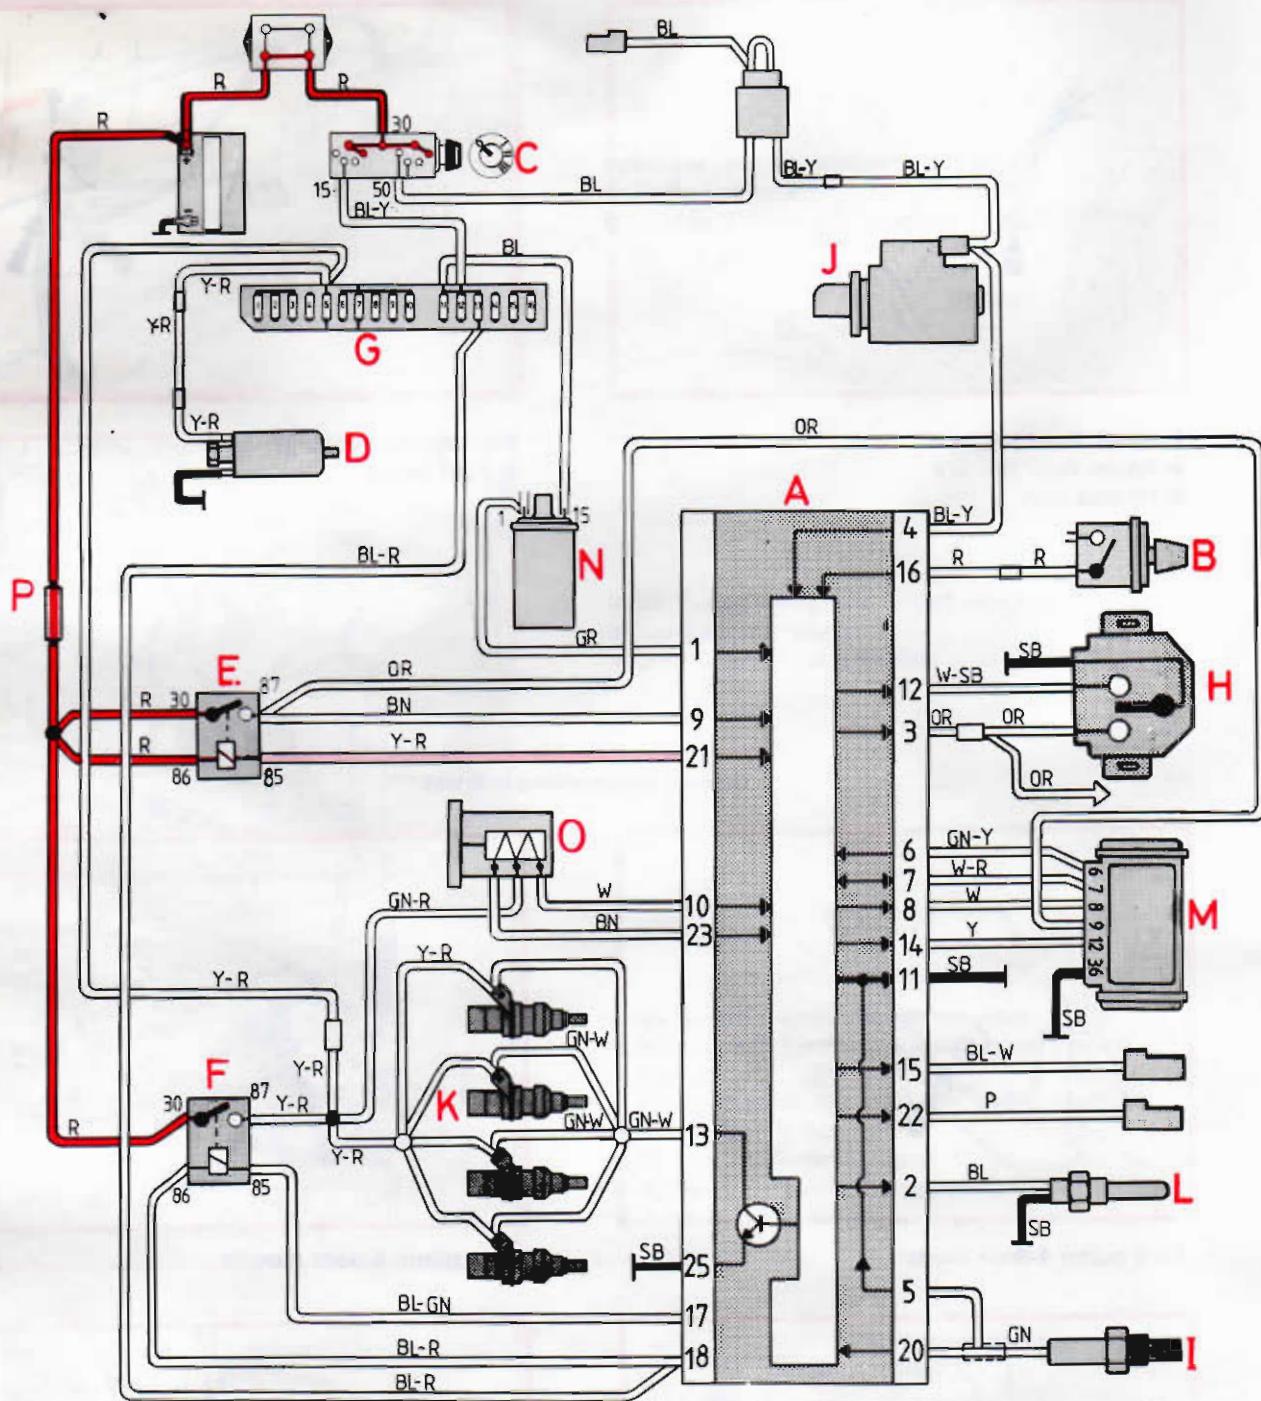

Tail lights, 4-door models

Tail lights, 5-door models

# LH-Jetronic II fuel injection

138182-V

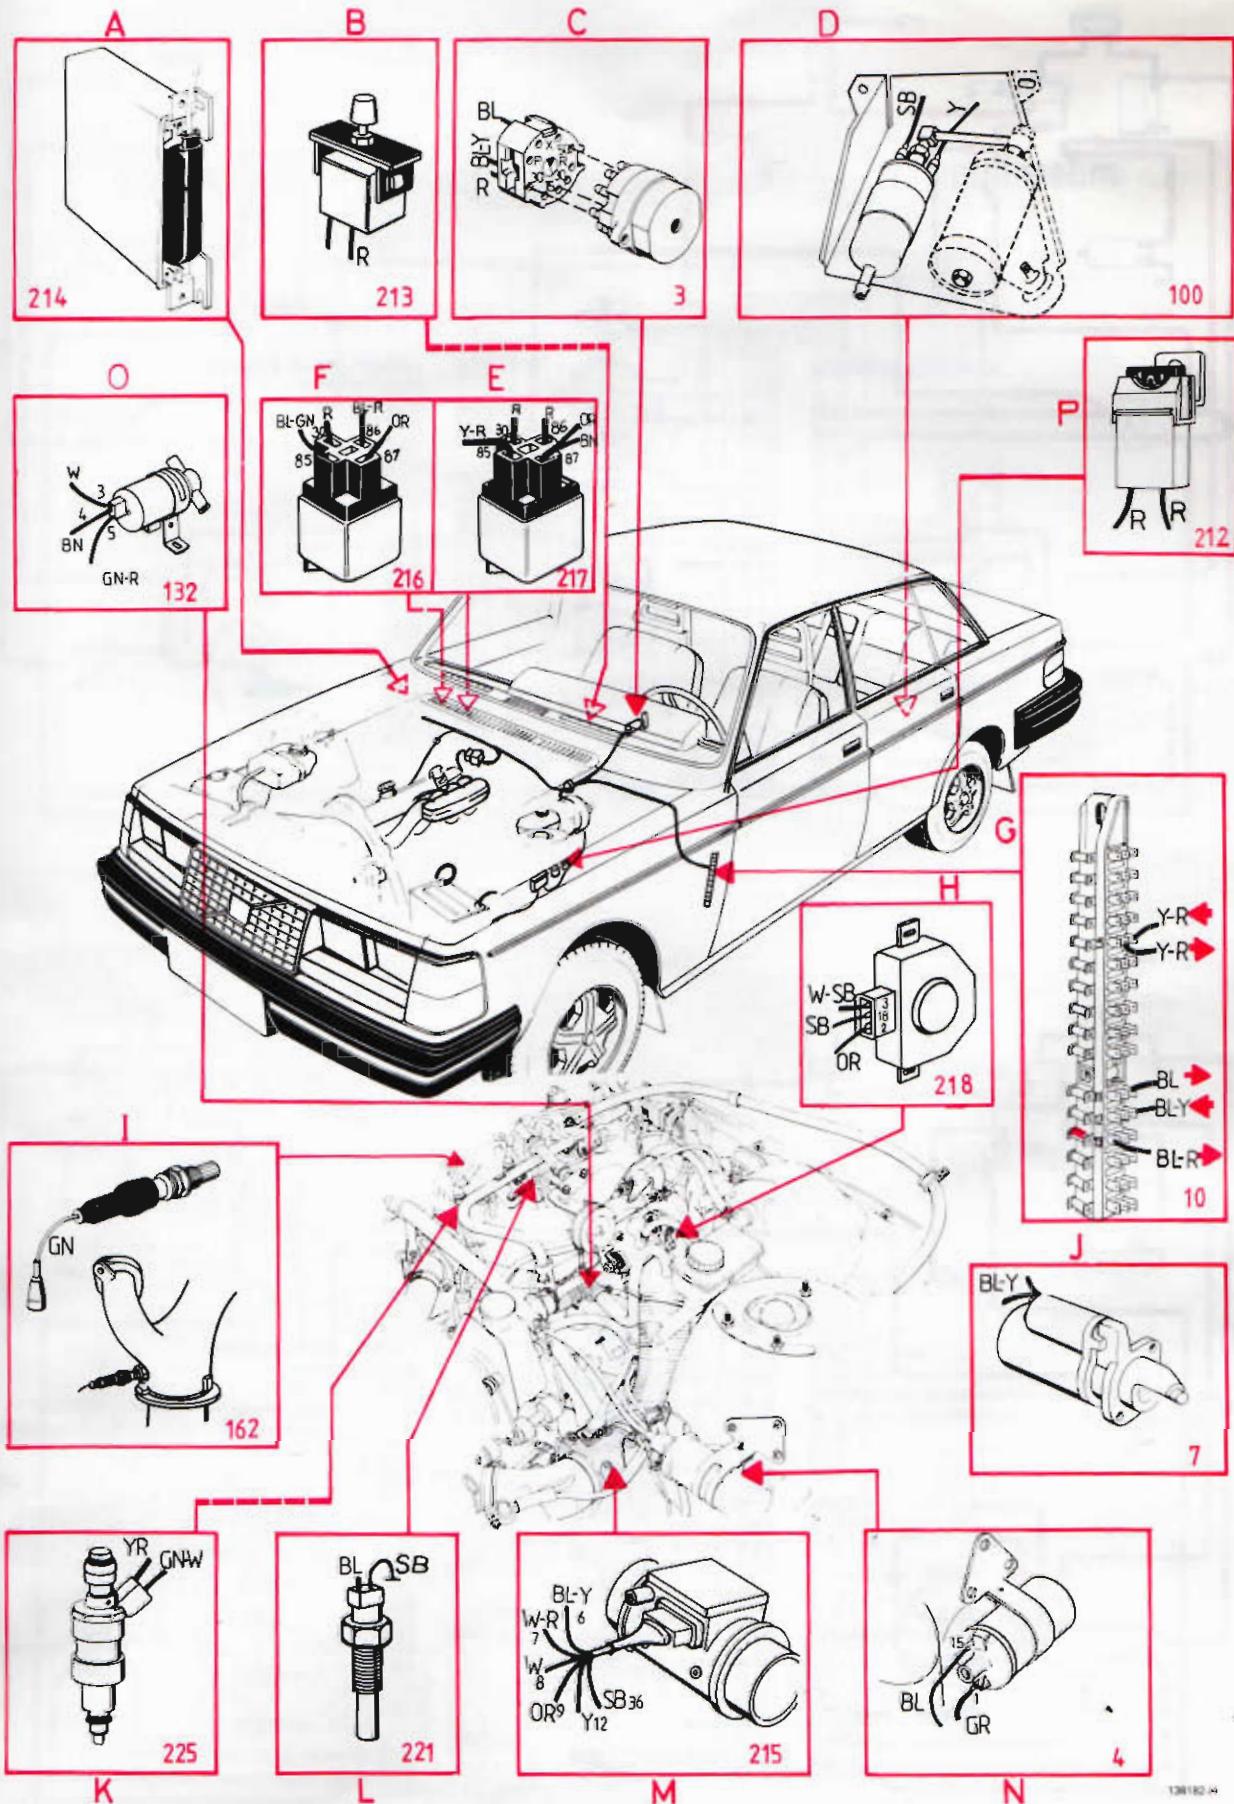

- A Control unit
- B Microswitch, AC
- C Ignition switch
- D Fuel pump
- E Main relay
- F Fuel pump relay
- G Fusebox
- H Throttle switch
- I Lambdasond sensor
- J Starter motor

- K Injectors
- L Coolant temp sensor
- M Air mass meter
- N Ignition coil
- O Idling valve
- P Fuse (25-amp)

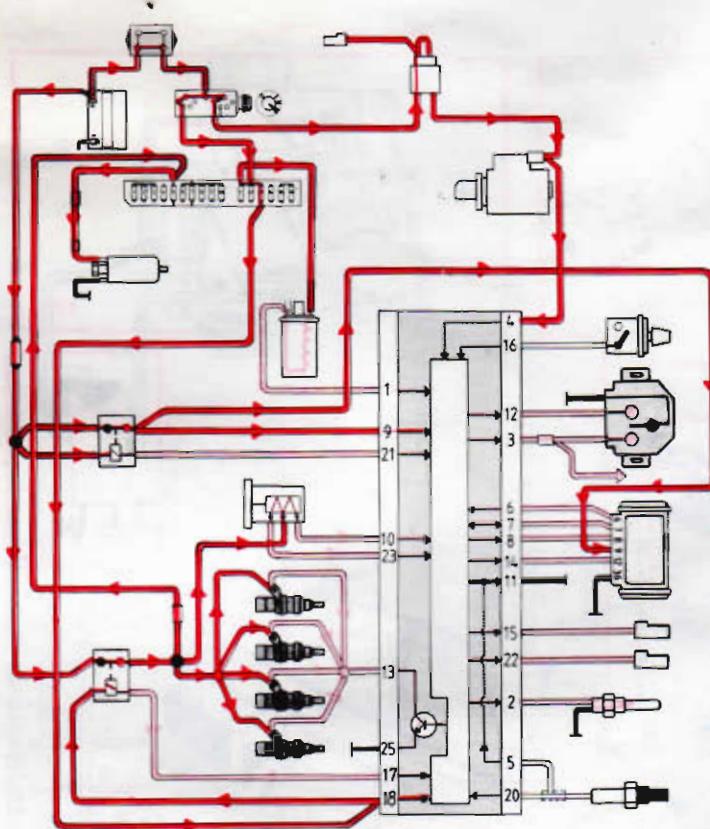

Fuse No. 13

Combined instrument

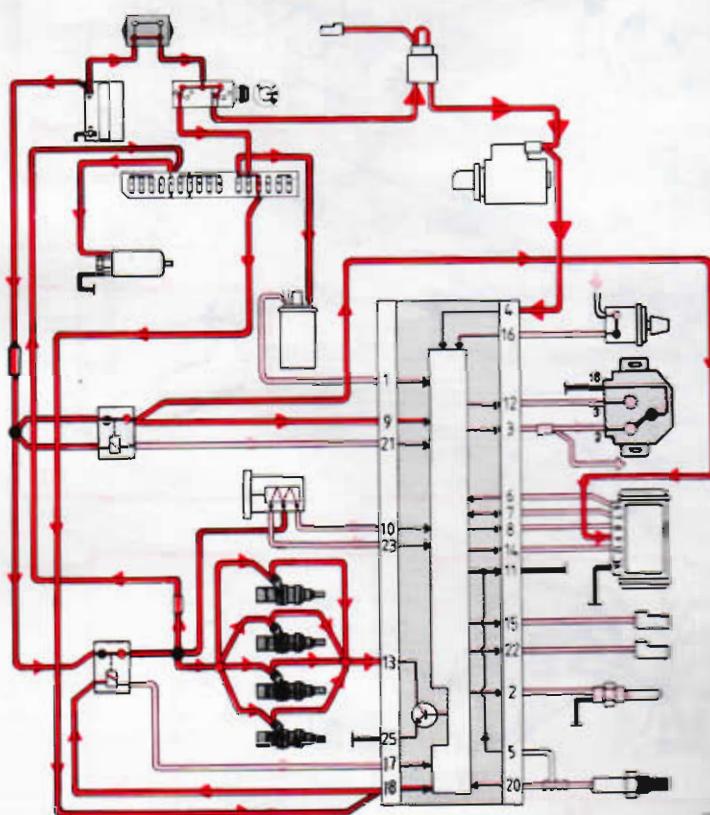

## LH-Jetronic II fuel injection

# LH-Jetronic fuel II injection

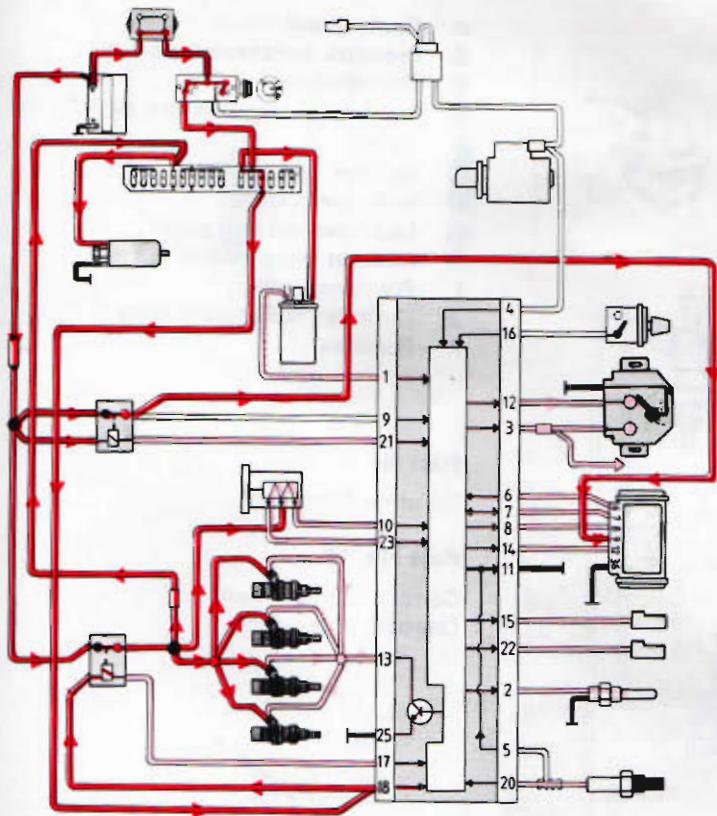

Start, cold engine

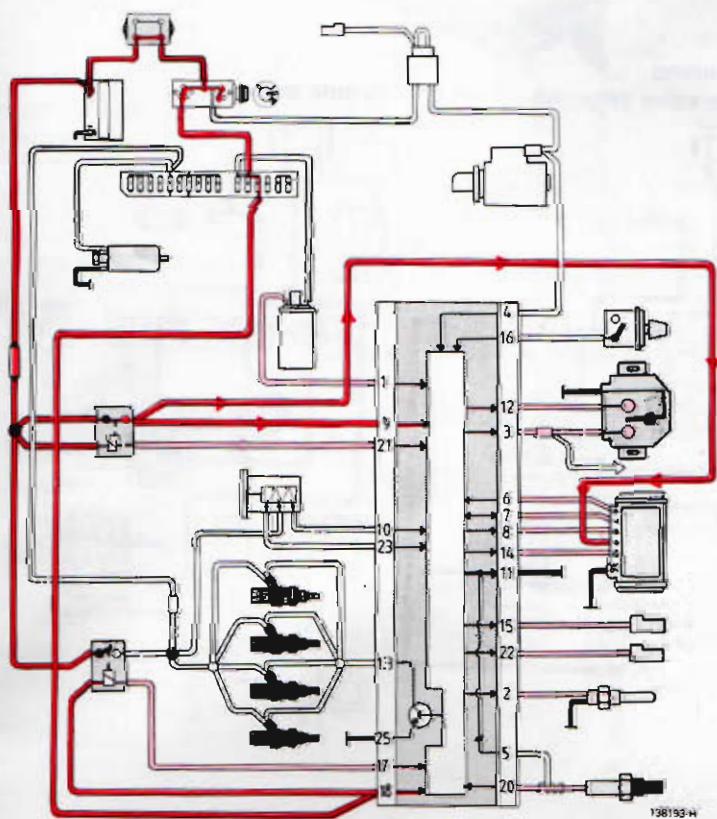

Start, hot engine

# LH-Jetronic II fuel injection

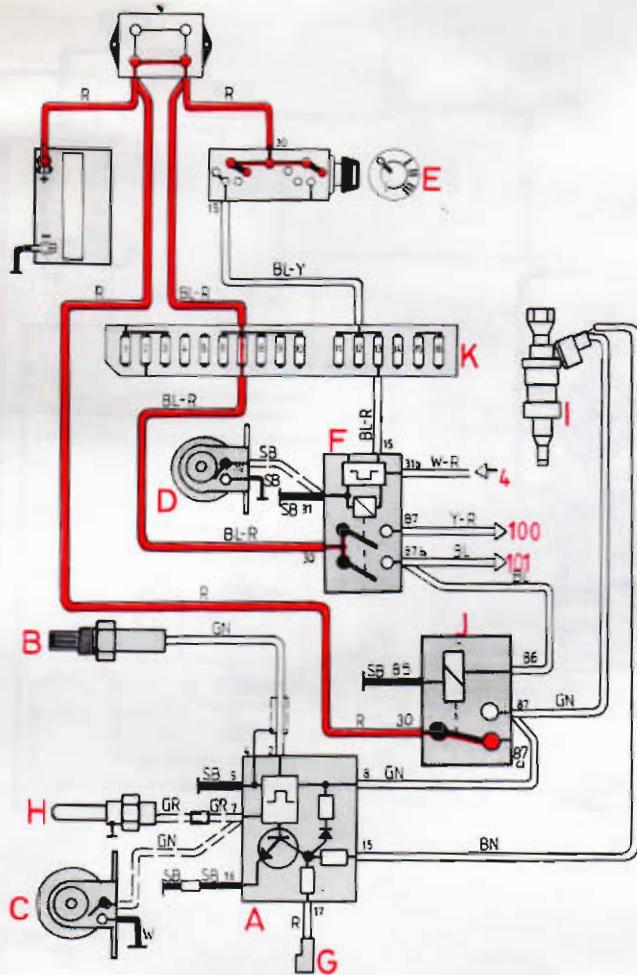

Engine running

Stalled

138193-H

# Lambda-system

- A Control unit
- B Pressure enrichment switch
- C Microswitch
- D Charge air overpressure switch, Turbo
- E Ignition switch
- F Fuel pump relay
- G Lambdasond test point
- H Coolant temp switch
- I Frequency valve
- J Lambdasond system relay
- K Fusebox

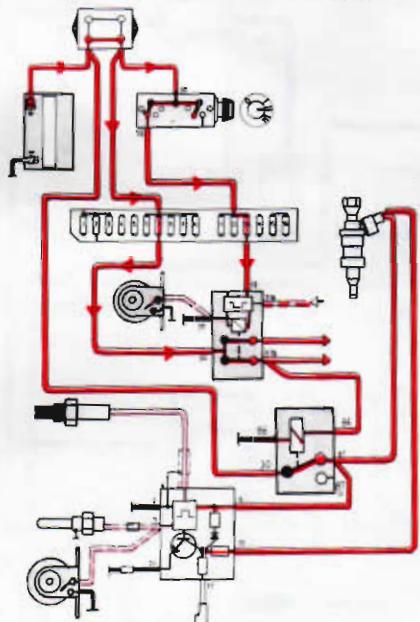

## Fuse No. 7

No other functions

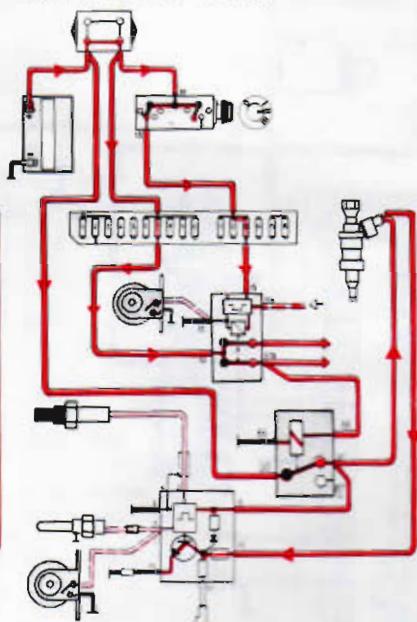

## Fuse No. 13

Combined instrument  
Direction indicators

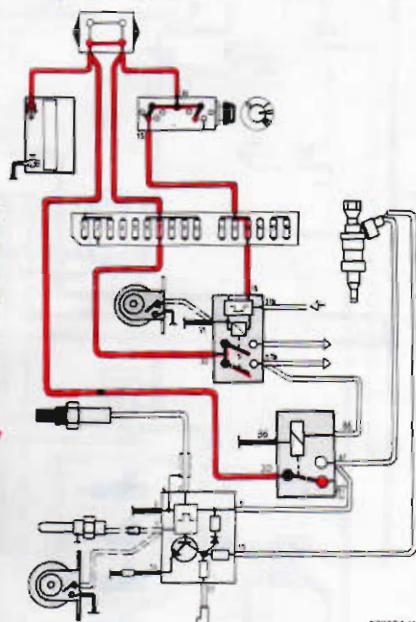

**Engine running**  
Frequency valve in duty cycle

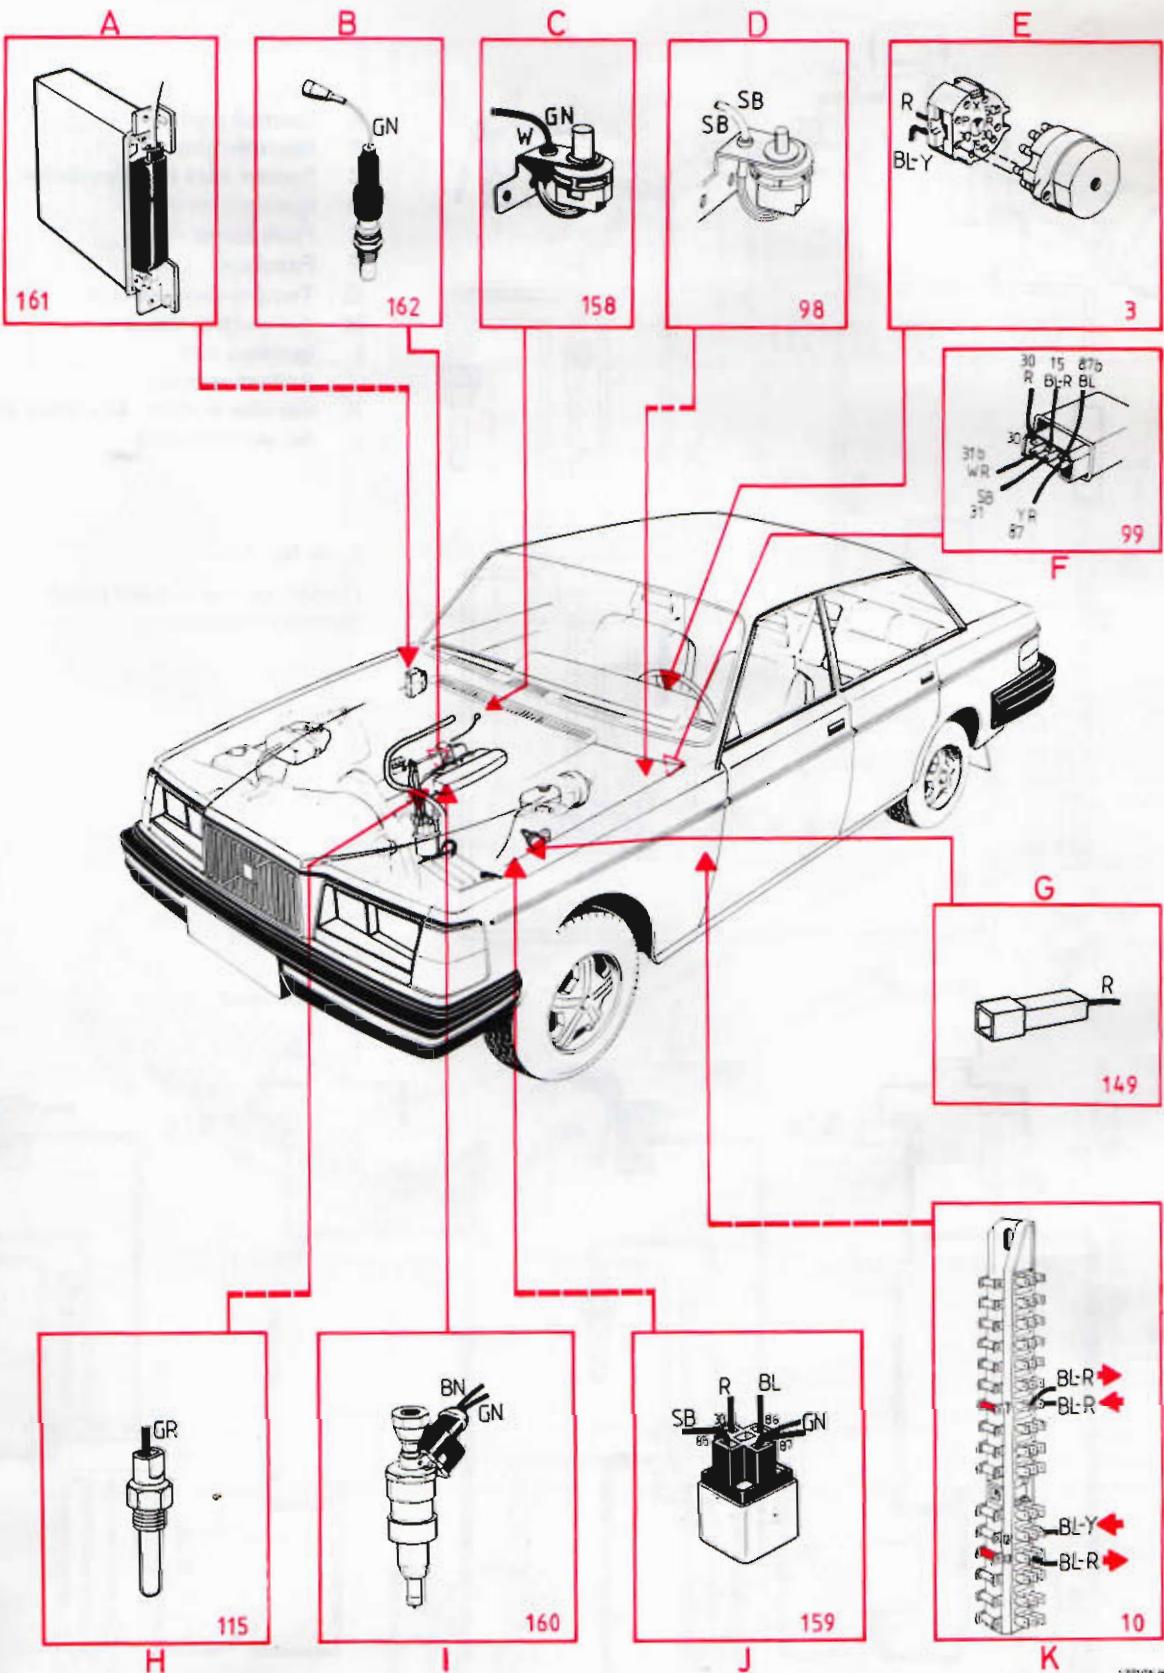

**Engine running**  
Frequency valve engaged

**Engine stalled**

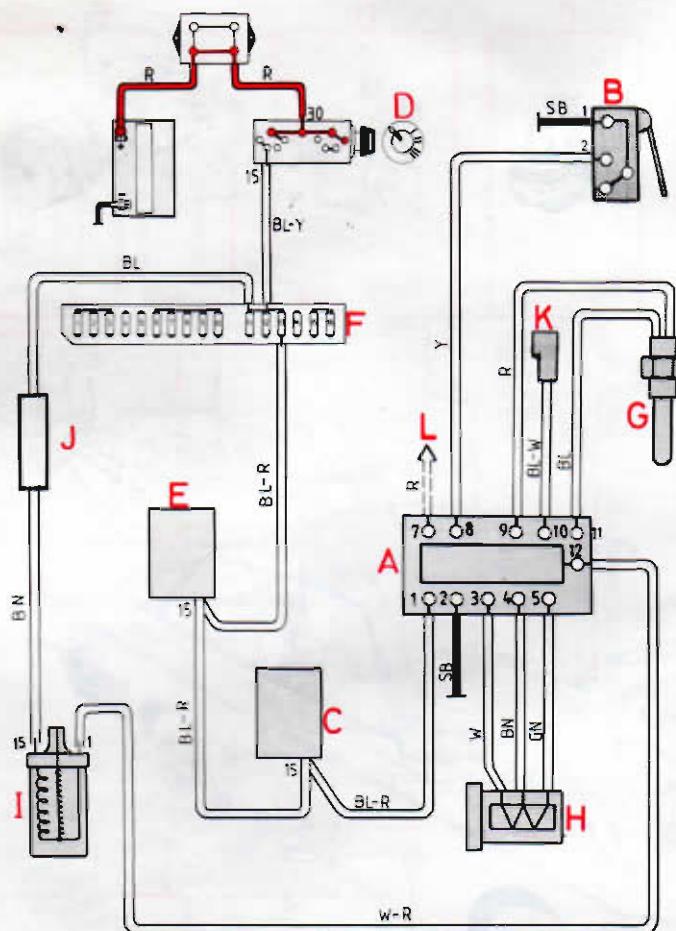

# Lambda-system

158152-N

# Constant idle speed system (CIS), Turbo

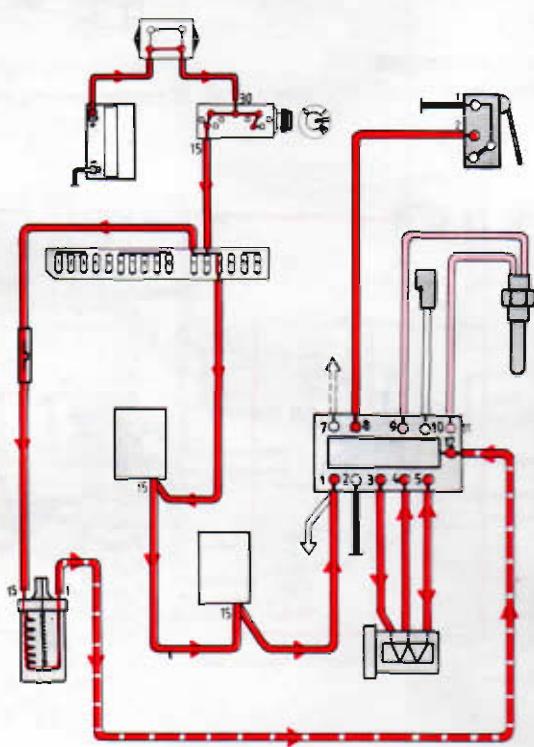

- A Control unit
- B Microswitch
- C Fasten seat belt reminder
- D Ignition switch
- E Fuel pump relay
- F Fusebox
- G Temperature sensor
- H Air control valve
- I Ignition coil
- J Ballast resistor
- K Service output, adjusting idle
- L AC microswitch

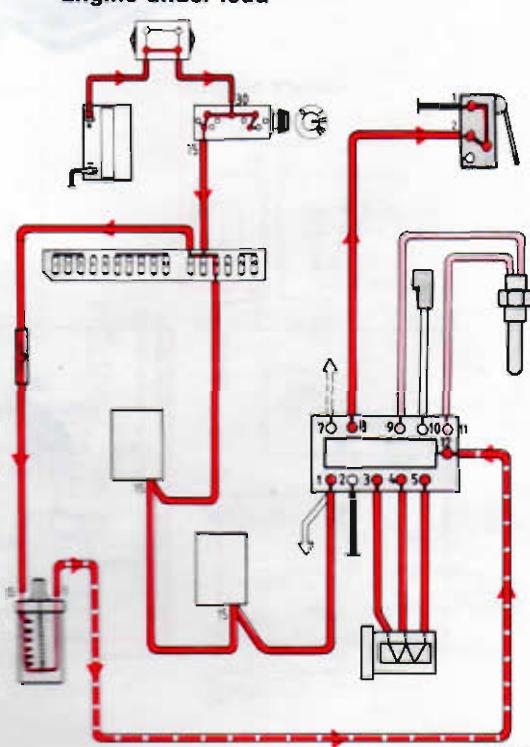

## Fuse No. 13

Direction indicators

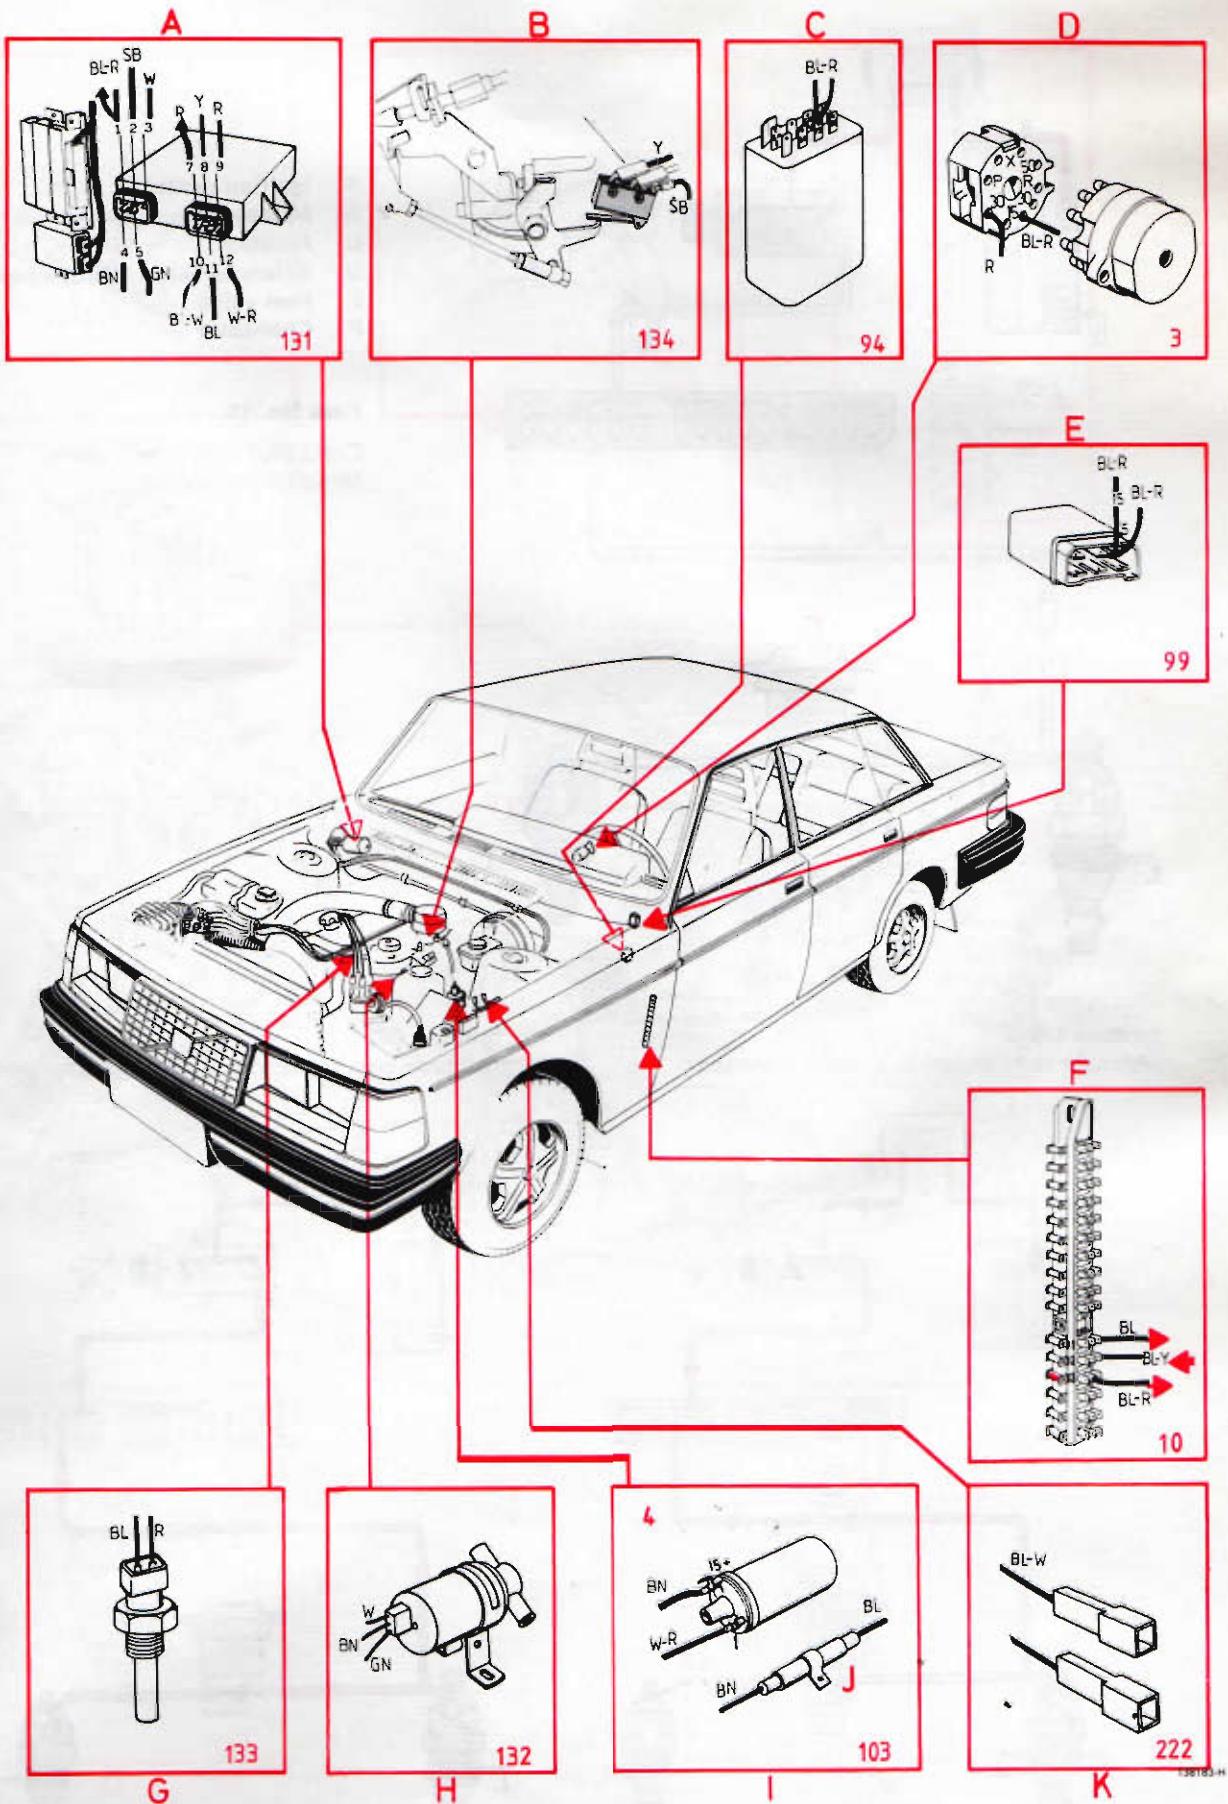

Idling

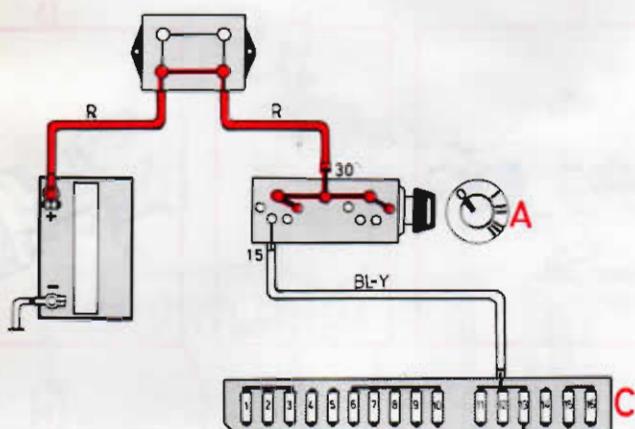

Engine under load

# Constant idle speed system (CIS), Turbo

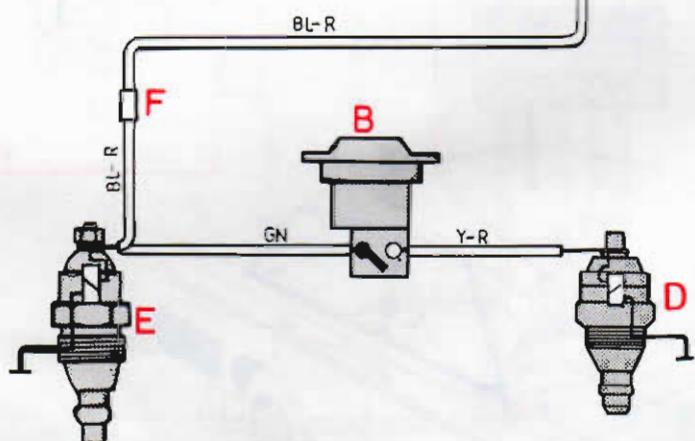

# Altitude compensation system D 24 USA/Canada

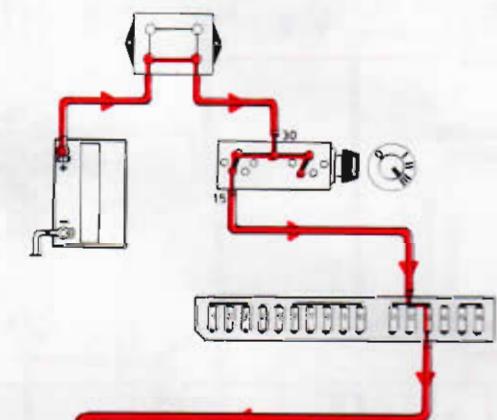

- A Ignition switch
- B Microswitch, Aneroid unit
- C Fusebox
- D Solenoid valve, altitude compensation
- E Fuel valve
- F Connector

## Fuse No. 13

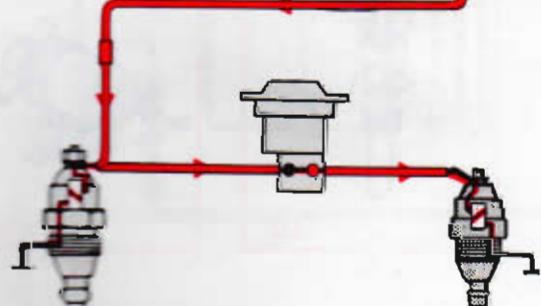

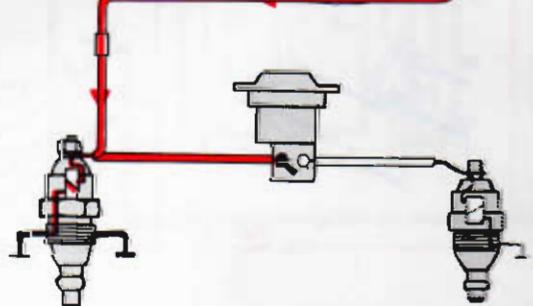

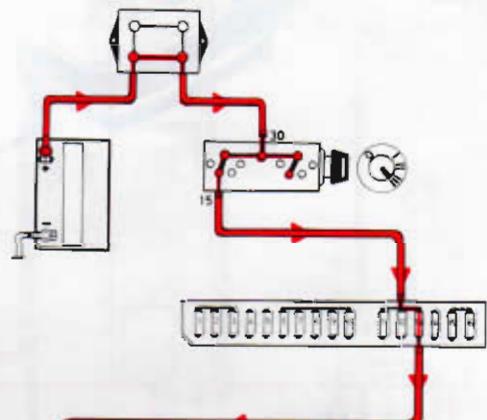

Combined instrument panel  
Direction indicators

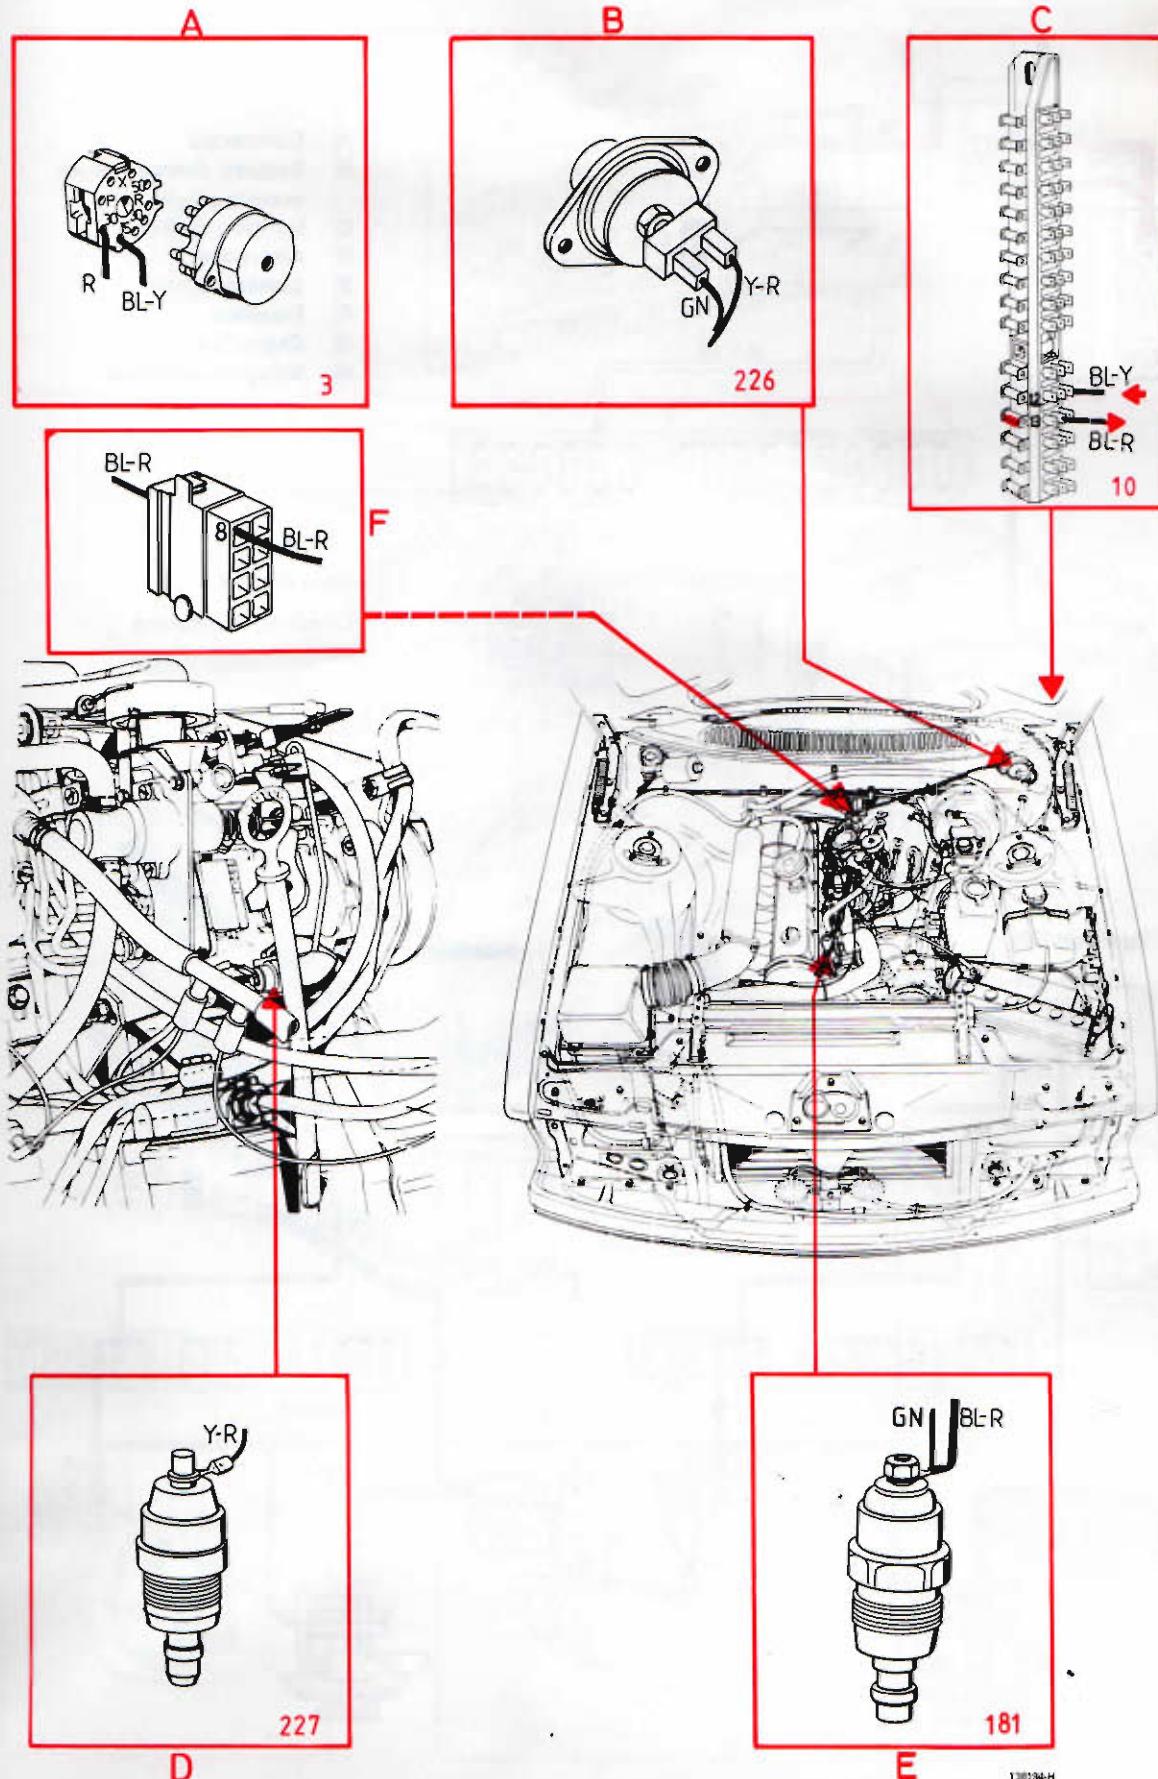

**Ignition ON**  
(Altitude compensation system activated)

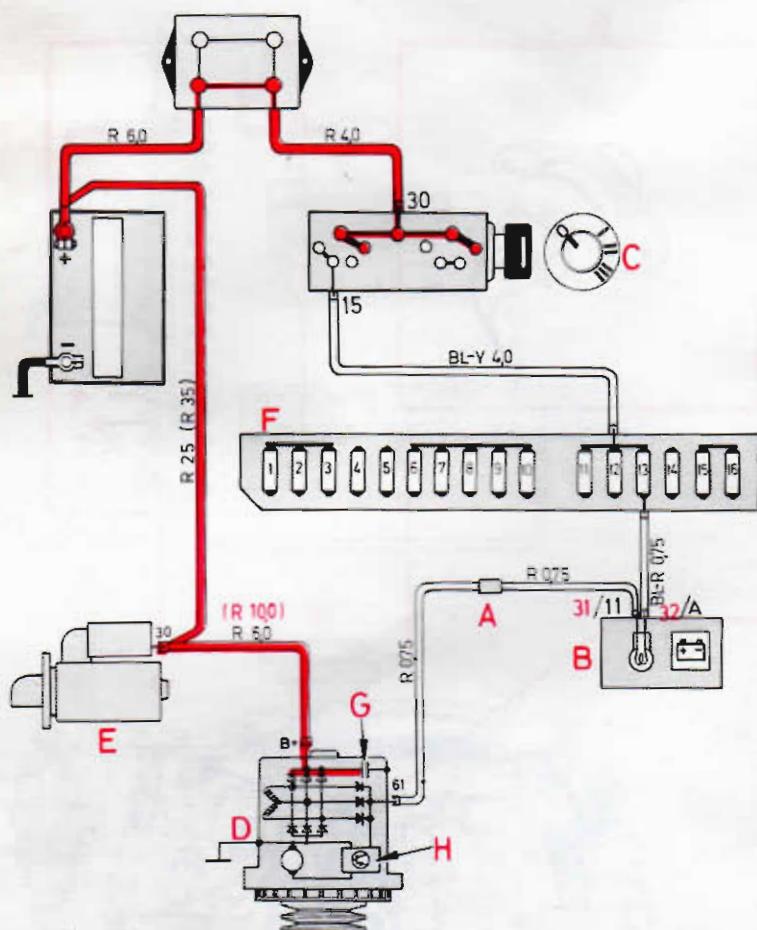

**Ignition ON**  
(Altitude compensation system not activated)

# Altitude compensation system D 24 USA/Canada

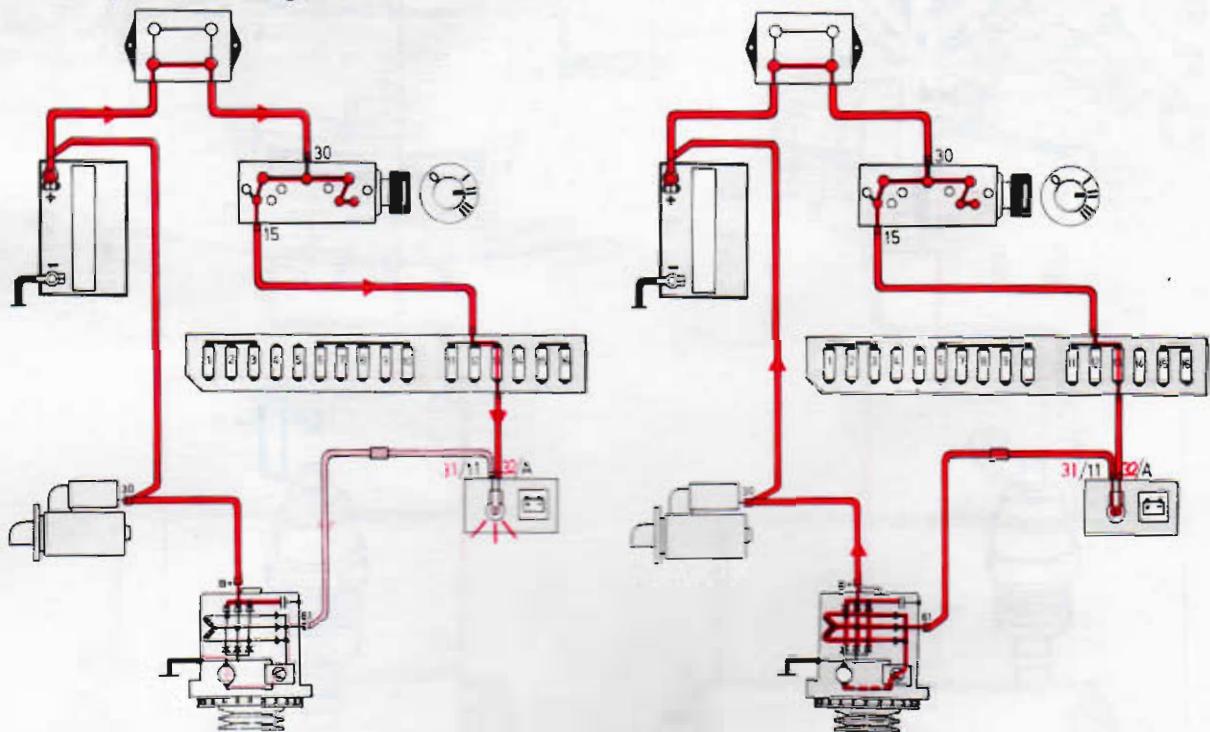

# Charging system

**Ignition ON**  
(engine not running)

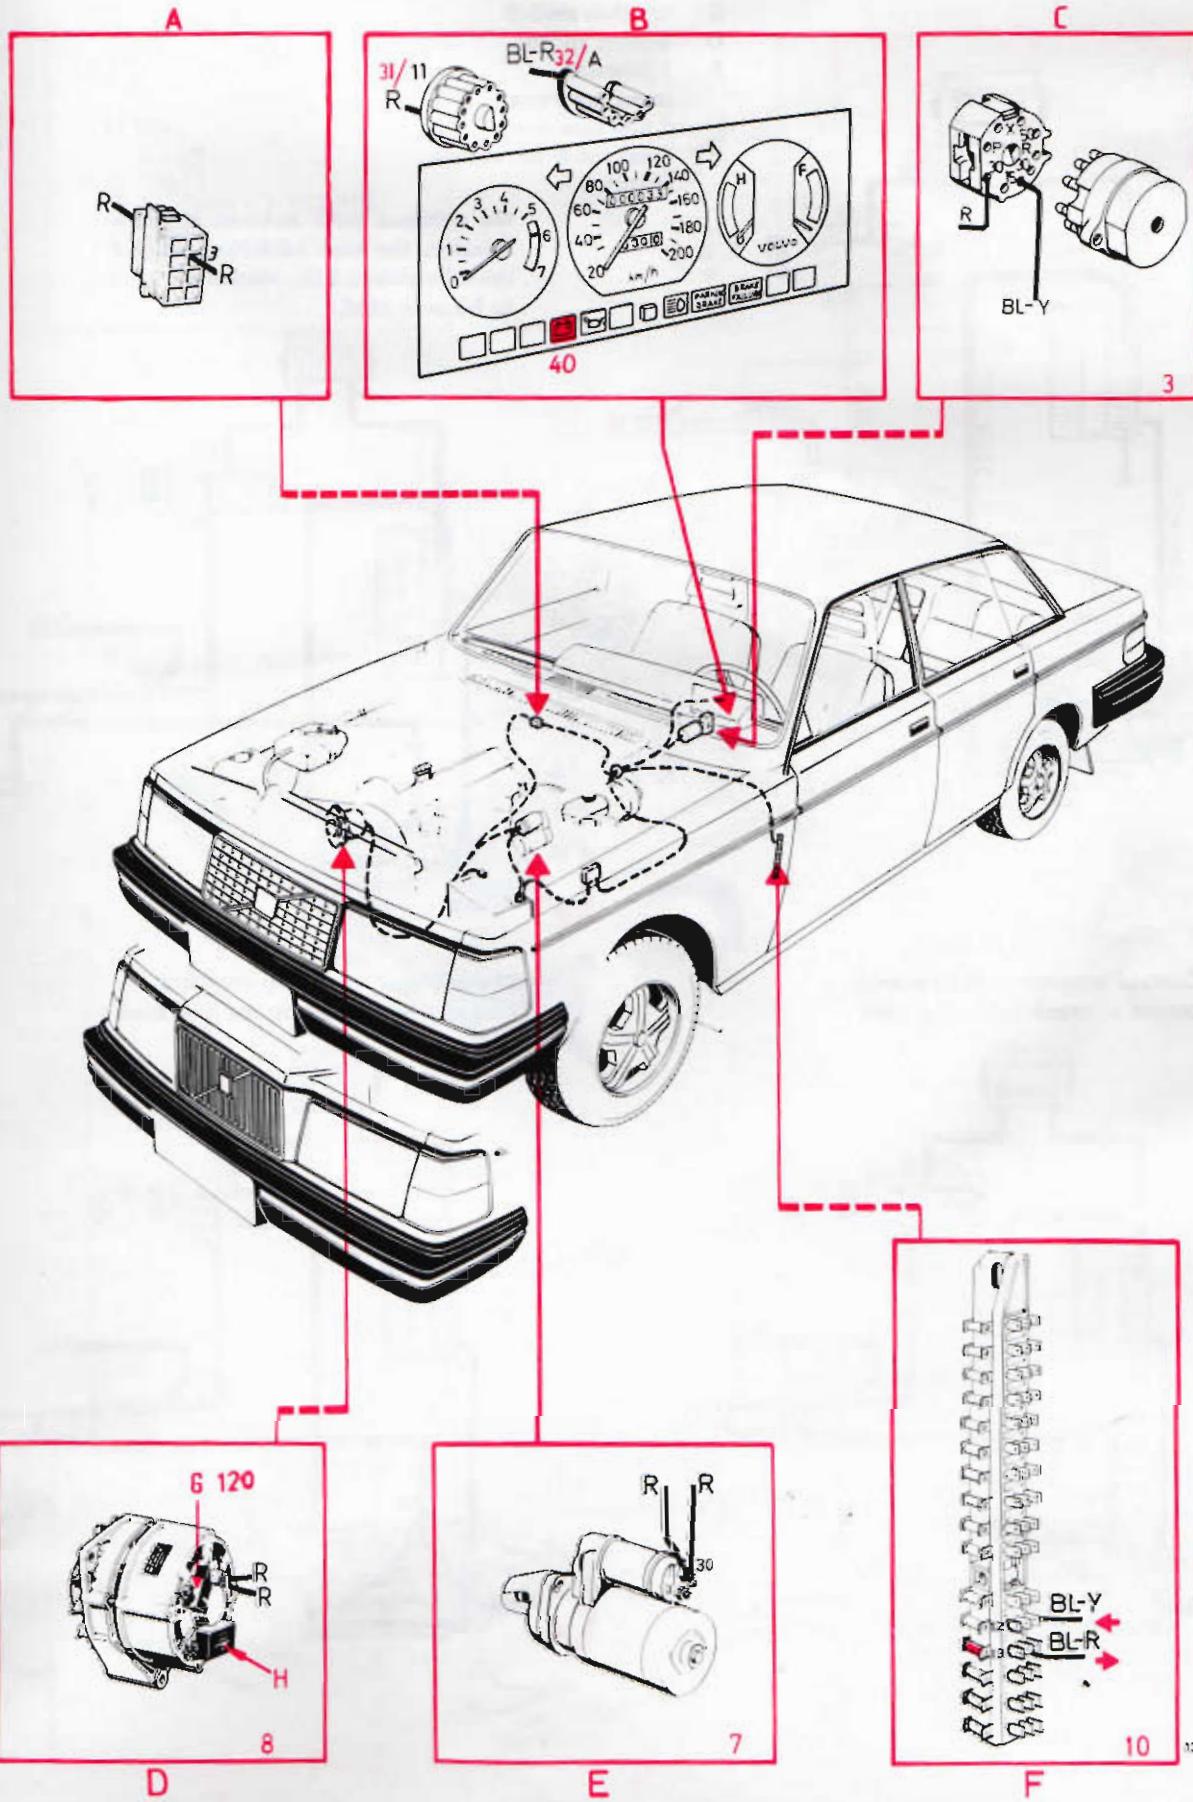

**Fuse No. 13**  
Direction indicators

**Alternator charging**

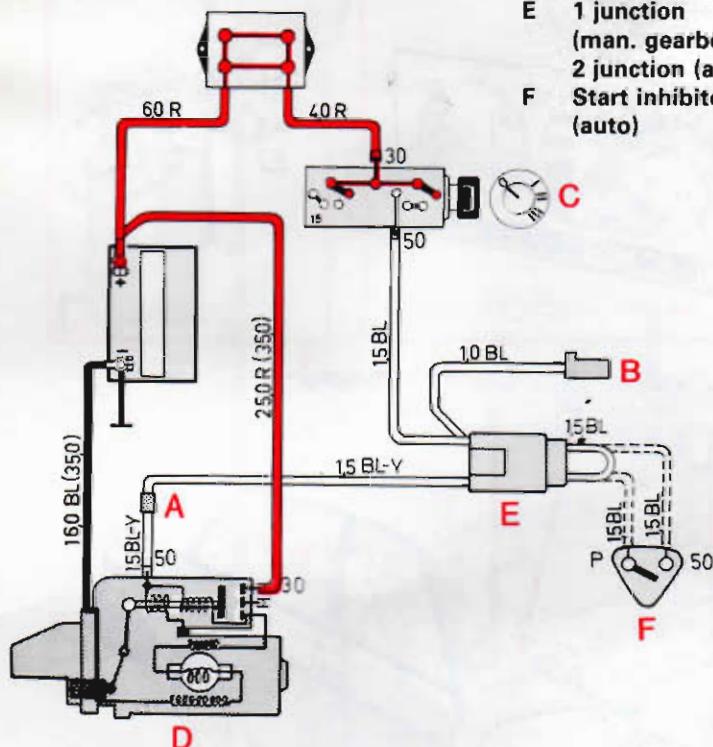

- A Connector
- B Battery charge failure warning light
- C Ignition switch
- D Alternator
- E Starter motor
- F Fusebox
- G Capacitor
- H Integral regulator

# Charging system

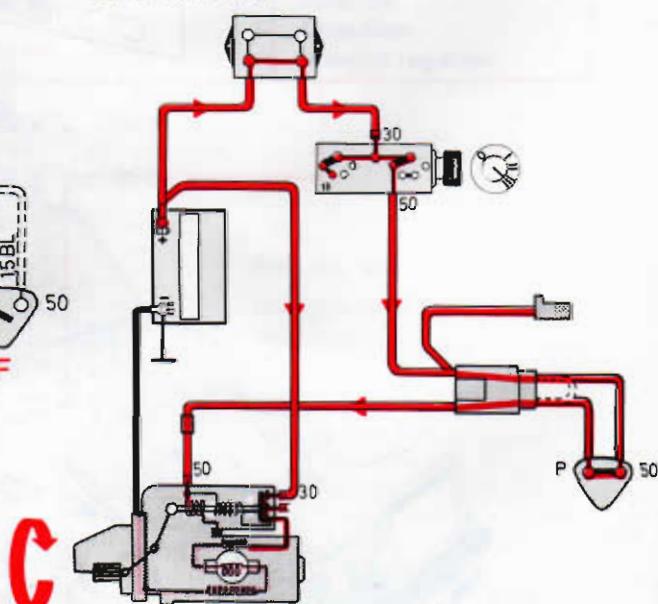

# Starting circuit

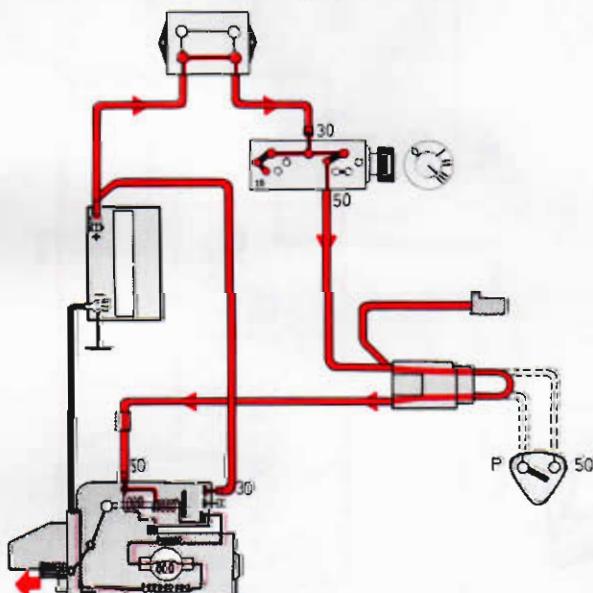

- A Connector
- B Service socket for starting engine
- C Ignition switch
- D Starter motor
- E 1 junction (man. gearbox)  
2 junction (auto)
- F Start inhibitor switch (auto)

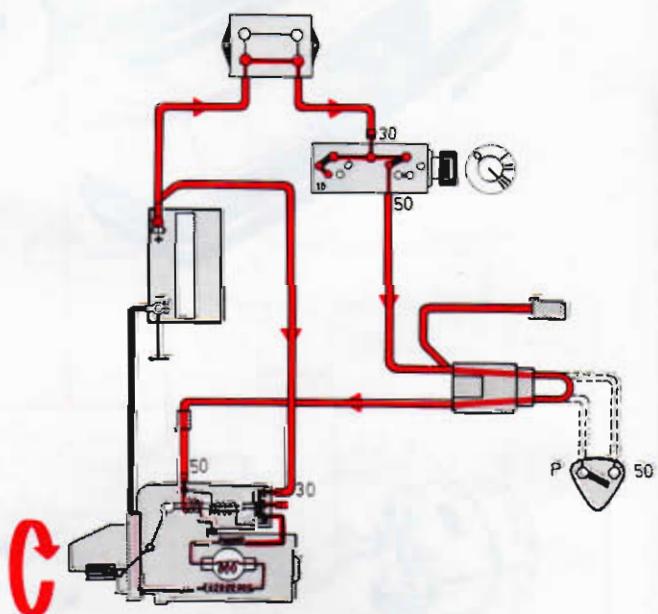

On vehicles with automatic transmission, the start inhibitor switch F must be closed if the starter motor is to be activated.

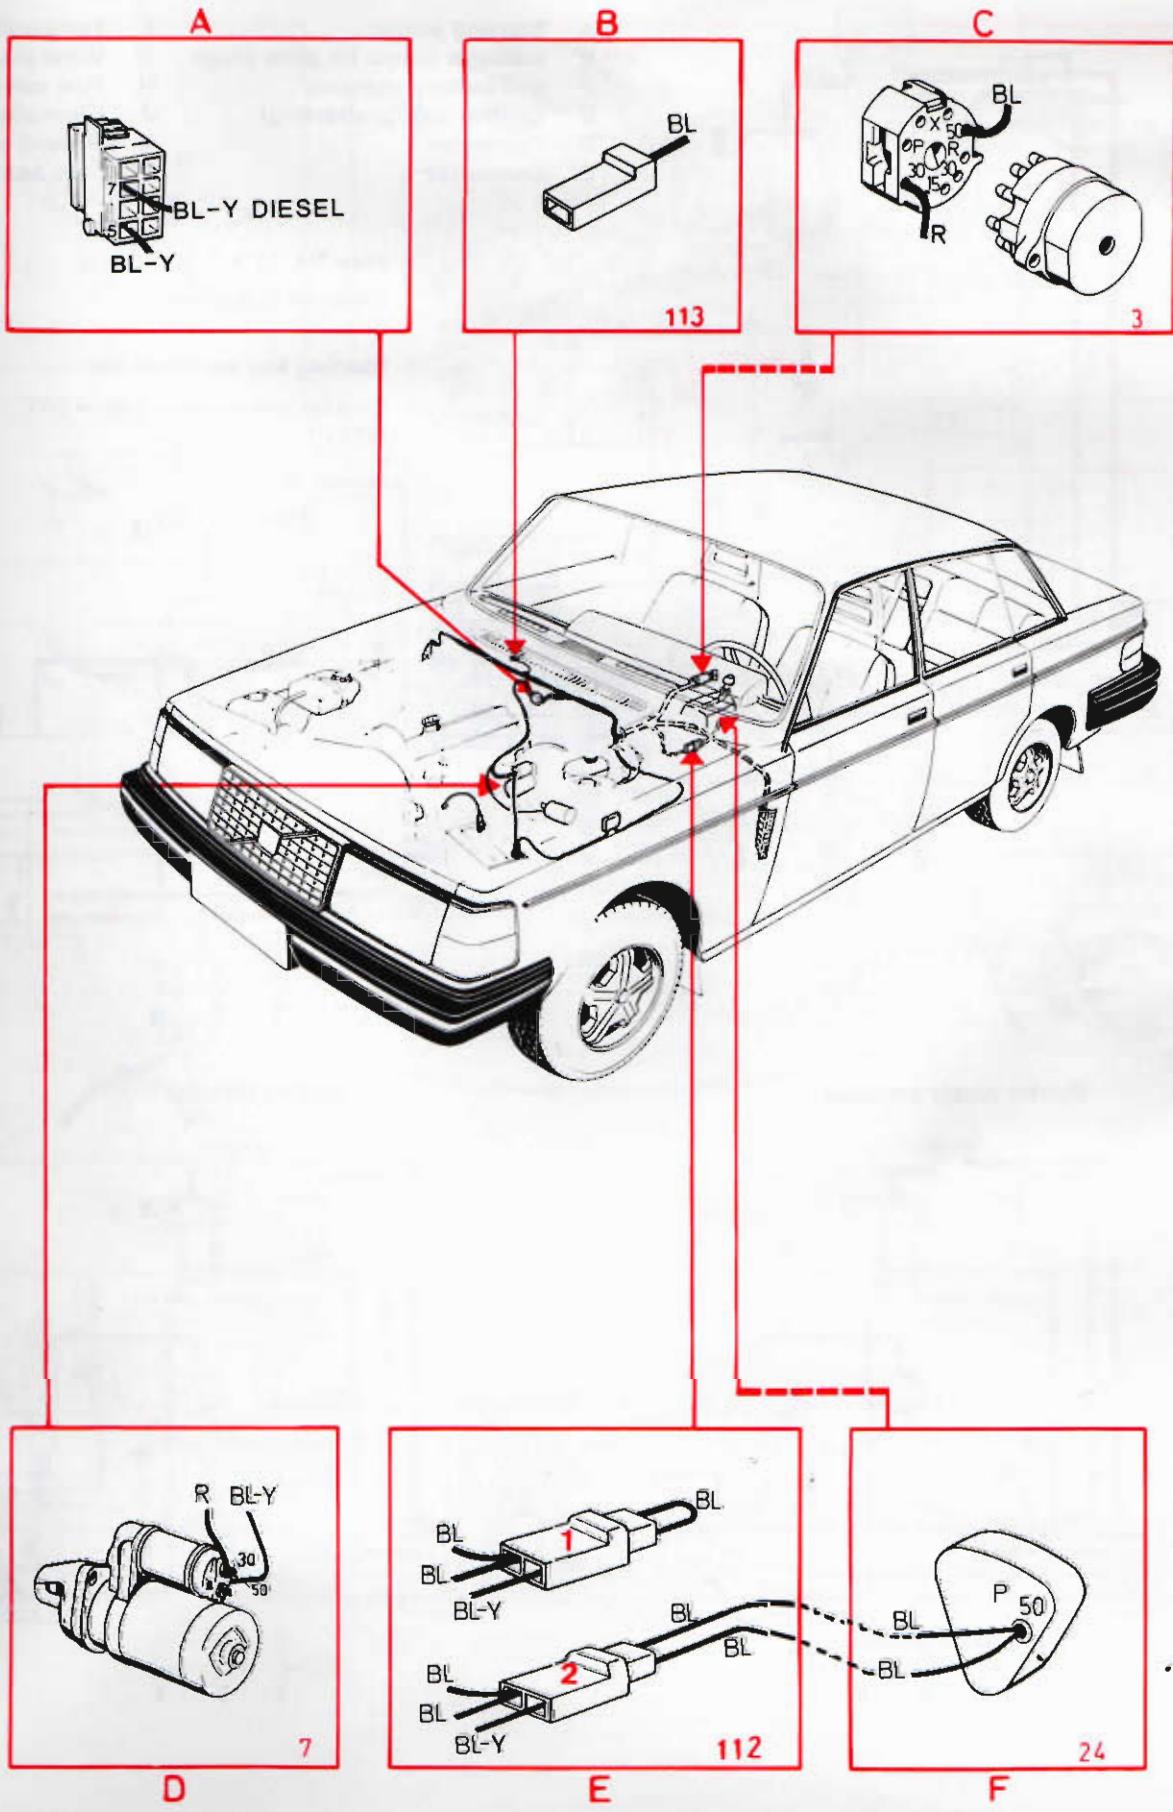

Control magnet pushes starter pinion to mesh with ring gear

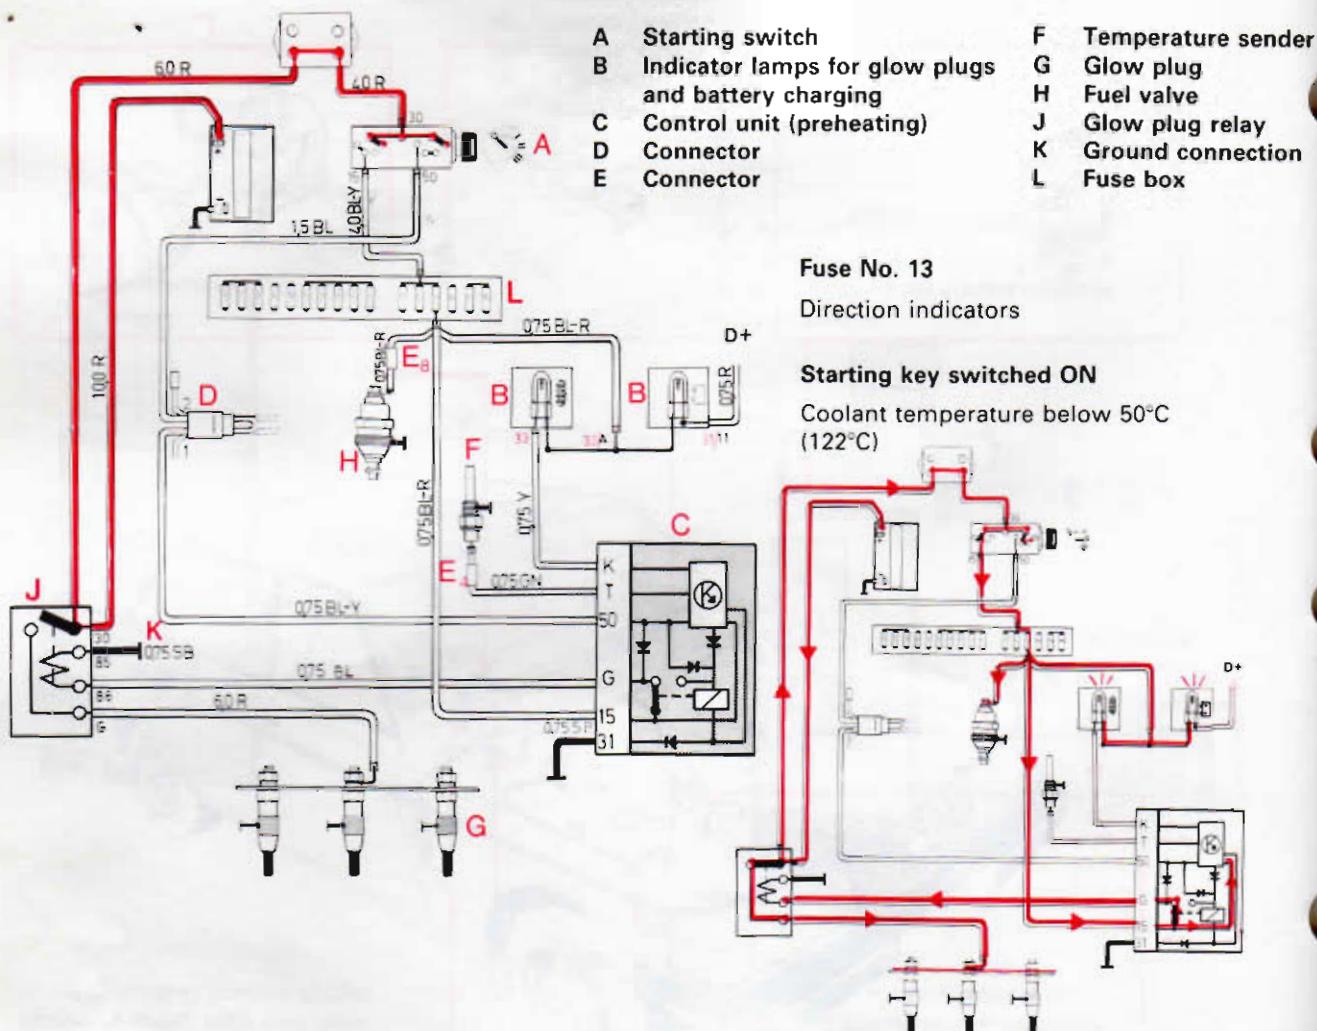

Starter pinion in mesh, contacts closed, and starter motor operates

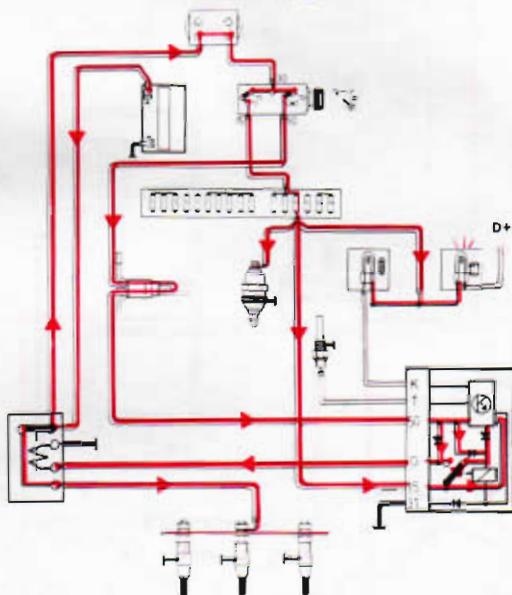

# Starting circuit

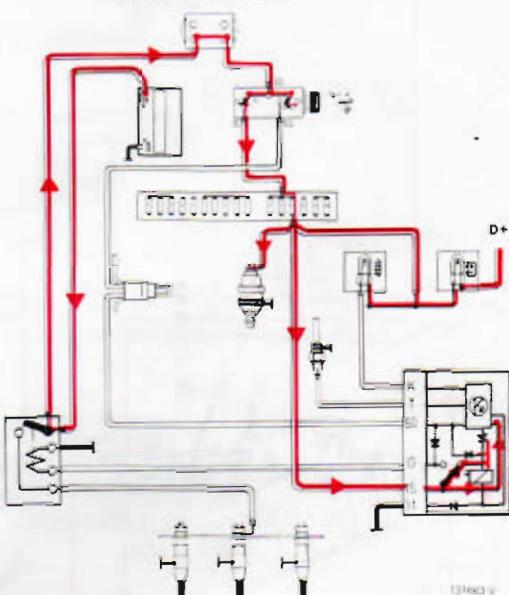

# Pre-heating (glow plug) system, diesel, 240

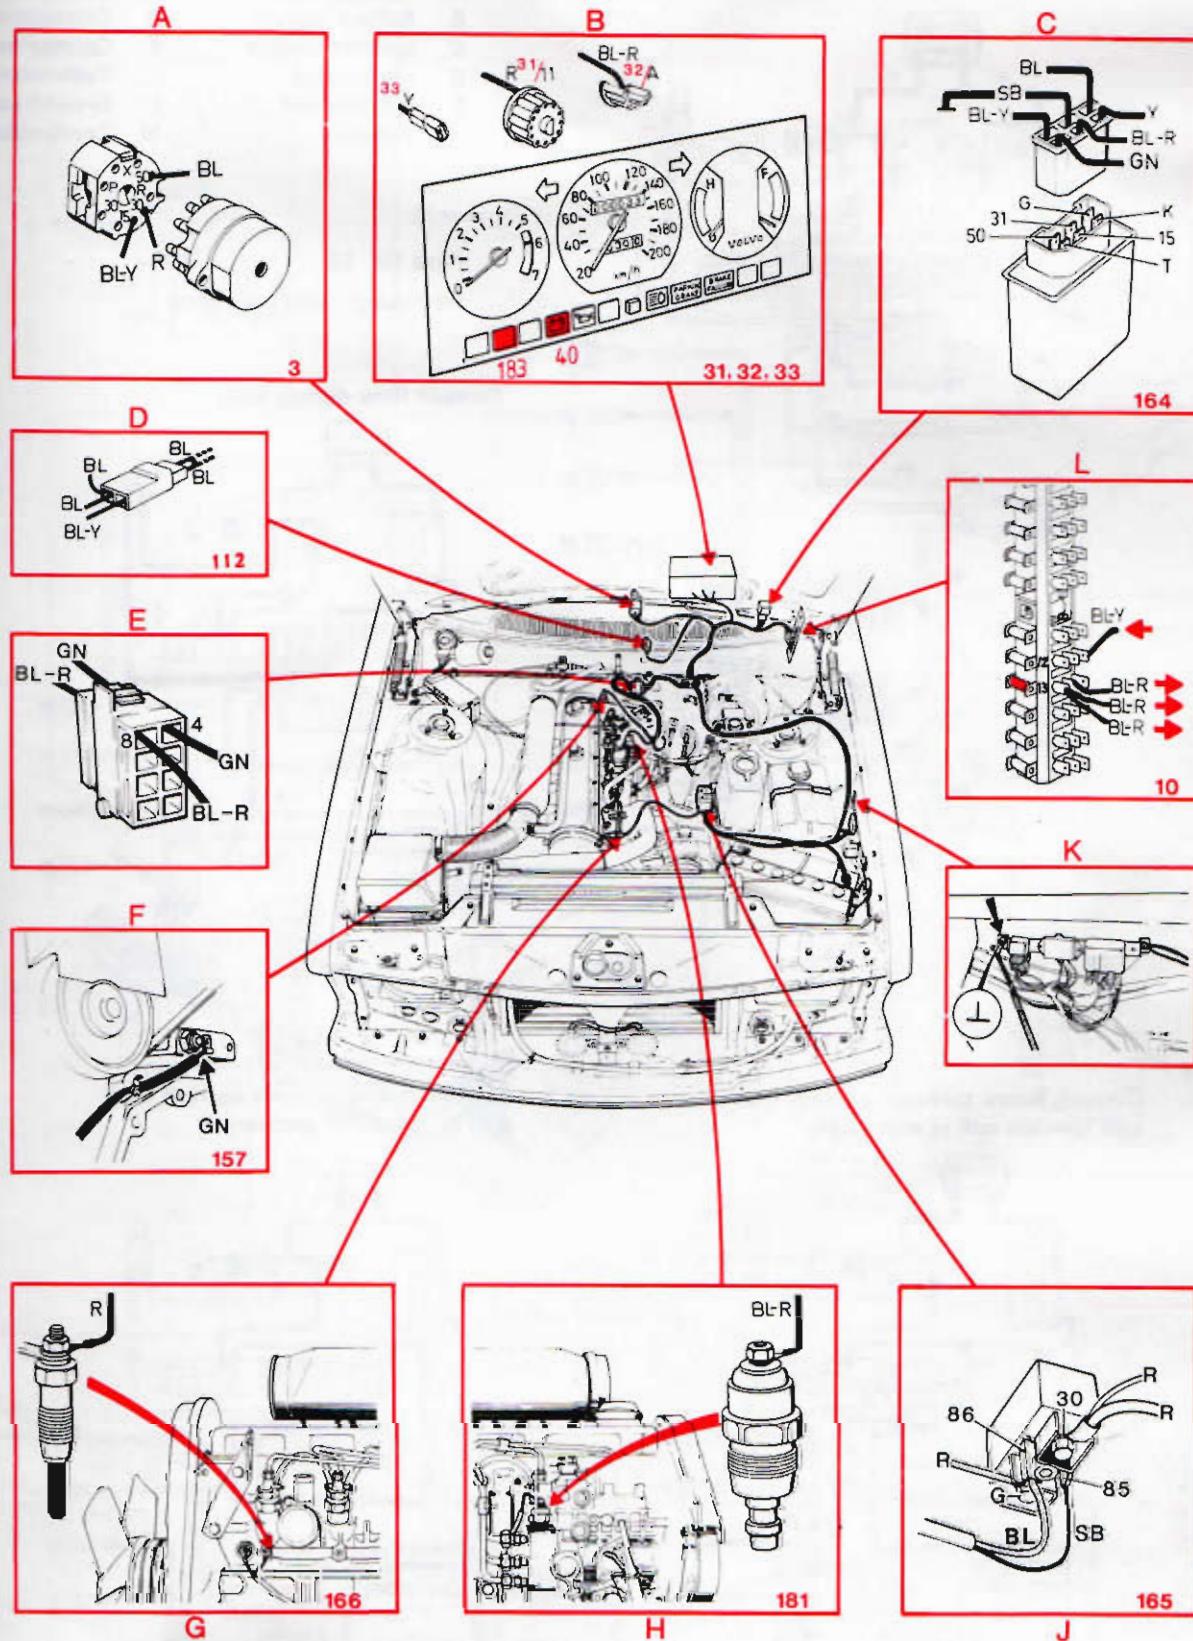

**Starter motor engaged**

**Engine running**

# Cruise control

## Setting of speed

Switch position ON and SET SPEED button depressed.  
Relay and vacuum valve in speed regulator grounded through brake light bulbs. Current is not sufficient to illuminate brake lights.

## Maintaining selected speed

Switch "ON"  
(Provided that speed is greater than 48 km/h (30 mph) and brake and/or clutch pedals not depressed)

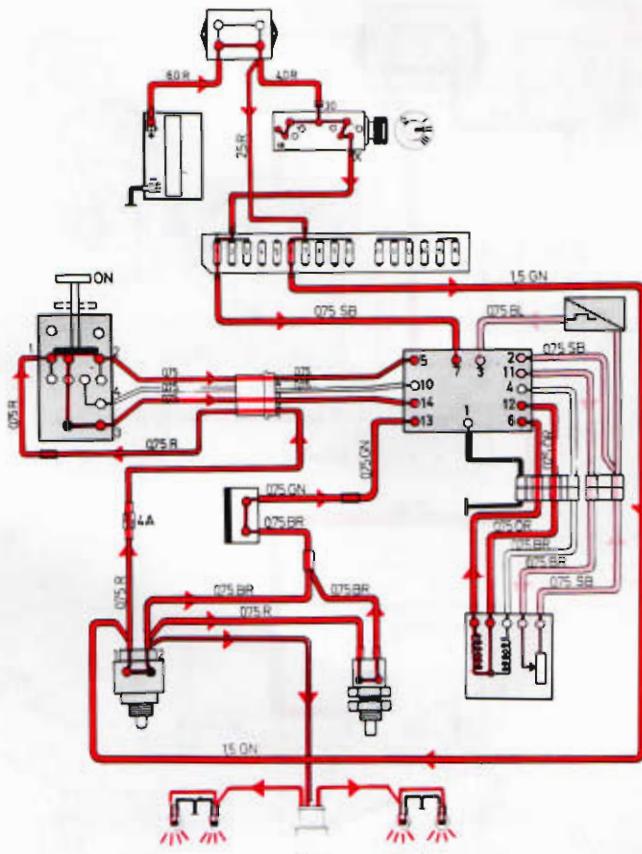

# Cruise control

## Braking

Switch "ON"

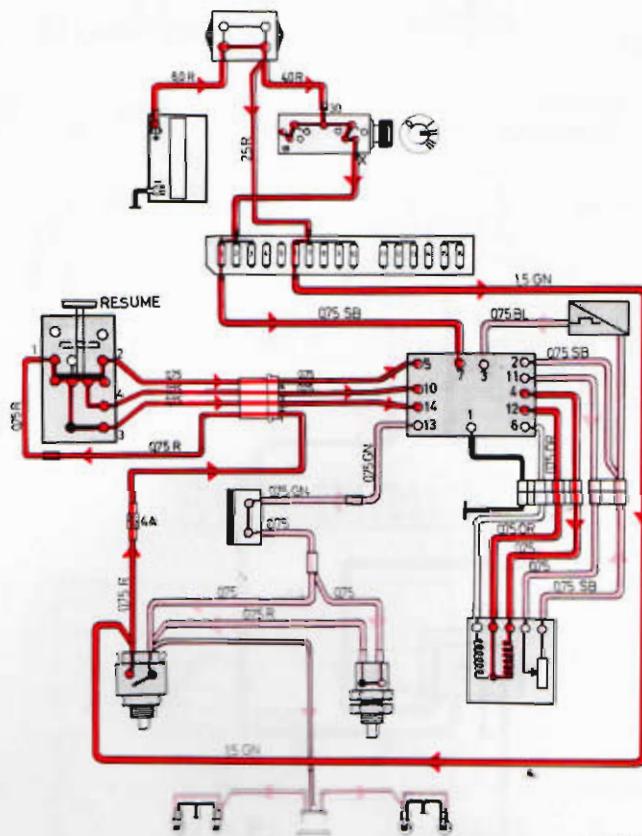

Brake pedal depressed (ground connection interrupted)

Control unit is grounded via brake lights, but on braking and/or depressing clutch pedal the ground connection is interrupted and the control unit is de-activated. The same happens if both brake light bulbs blow out.

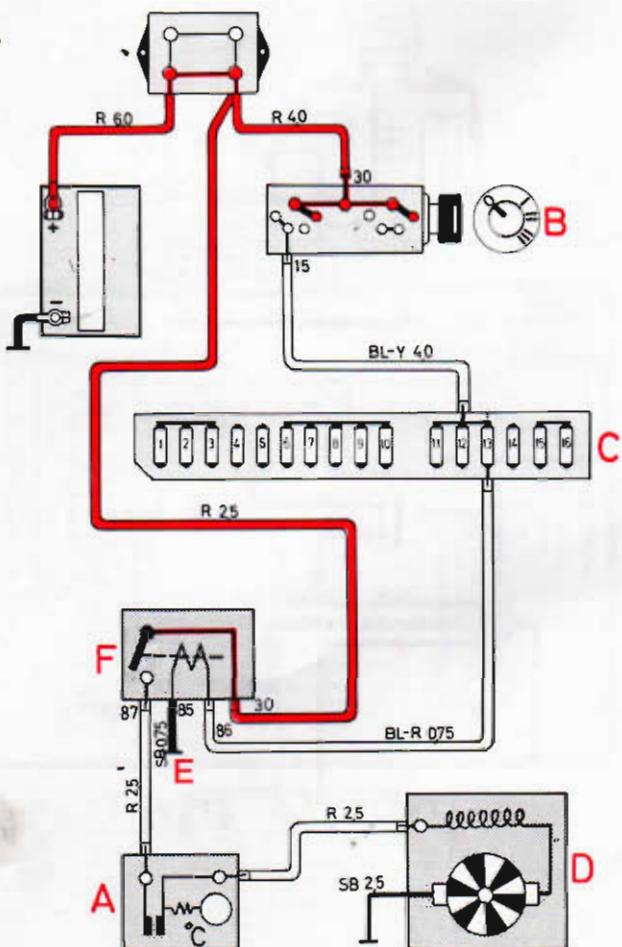

## Resuming the previously selected speed

After braking the switch must be turned to RESUME so that set speed can be reobtained.

# Electric cooling fan

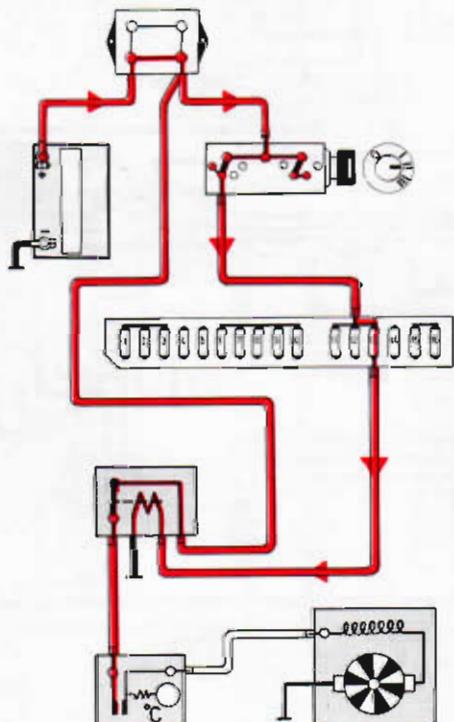

- A Thermostat contact
- B Ignition switch
- C Fusebox
